Will Take Part in Contest.

A largely attended session of the Junger Maennerchor took place at their headquarters yesterday afternoon and one of the principal topics of discussion was the eisteddfod which takes place in the armory on Decoration Day.

The members propose to take part in the contest, and have begun active preparations, with a view to perfecting the singing organization of the society. There is no doubt, if the plans suggested are carried out successfully, that this aggregation of young Germans will render a good account of themselves and prove, as they have done before, a credit to the city of Scranton and the state of Pennsylvania.

The tendency of medical science is toward preventive measures. The best thought of the world is being given to the subject. It is easier and better to prevent than to cure. It has been fully demonstrated that pneumonia, one of the most dangerous diseases that medical men have to contend with, can be prevented by the use of Chamber-lain's Cough Remedy. Pneumonia always results from a cold or from an attack of influenza (grip), and it has been observed that this remedy counteracts the tendency of these diseases toward pneumonia.
