THE SCRANTON TRIBUNE-SATURDAY, FEBRUARY 15, 1902.

han the exchanges in many small citics, giving connection not only to every office but every part of the immense plant and attended usually by two persons: here also is the sumptions office of II. Wehrum, the general manager, who knows every detail of the gigantic establishment and Ironing Is Different who ranks with the biggest steel men of the

Collars and Cuffs we iron by steam heat which makes the linen more pliable than gas heat, and less liable to crack,

LOST FOR A DAY.

But Schmidt Turned Up Among the Living Last Night.

Herman Schmidt, of 513 Cedar ave nue, was either lost in the Delaware und Hudson's Greenwood mine yesterday or else he decided to quit work for the day shortly after reaching the chamber in which he worked.

Schmidt is employed as a laborer by a miner named John Elverdoski. The latter went into the mine at o'clock after having ascertained that Schmidt had gone in ahead of him. His duties are multifations, endless. To perform them in the careful mannee which has always On reaching his chamber he found characterized him, he has to spend twelve and fifteen hours a day at his desk. He lives in the building and is in his office before the cheapest Schmidt's overcoat, mitts and dinner pail lying on the ground but not a sign of Schmidt,

clork has arrived, is still there after the most ambitious employe has started home. Supervis-He searched through some of the ing the construction of a \$40,000,000 steel plant is nearby workings and called the missing man by name but could find no trace of him. The mine foreman was ias them all. notified and a searching party was organized which went through a large portion of the mine without finding Sehmidt.

The latter turned up at his home In the most unconcerned manner last night about 9:50 and when seen by Tribune man refused to say any thing regarding his movements except: "Me work all day,"

Swarthmore College

Offers four courses of study leading to degrees in Arts, Science, Letters and Engineering. As a co-educational inand give rest to their own. Of course, it is easy to understand why a corporation with \$10,000,000 stitution it undertakes to provide college life in a home setting, with an atmosphere in which manly and womancharacter may develop naturally and completely. it is a typical "small college." The student comes in closest

personal relation with the teachers and enjoys the benefit of personal acquaintance and oversight of the heads of the institution.

It is ten miles from Philadelphia, in pne of the most interesting sections of but it is far, far from it. True, there are build-ings 550 feet in length, two of them; there are Pennsylvania. The site is one of great antural beauty. Two hundred acres of ny number of structures 200 and 300 fet long; wood, field and shaded lawn, the plcn short, there are more buildings and bigger han may be found in most manufacturing cities turesque gorge of Crum Creek, the distant view of the Delaware, lend a of 10,000 inhabitants, and the construction work on the real big buildings has hardly started. The biggest building now up is the foundry building, charming variety to the scene. There is ample opportunity for all kinds of putdoor enjoymenté.

Its equipment includes modern laboratories, libraries, work shops, hand-tome new gymnasium, etc. Catalogue on application. William W. Birdsall, president, Swarthmore, Pa.

Drink COFo. It tastes like coffee, **

MARRIED.

MOFFETT-WARD.-James Helser Moffett, of New York, and Sadle Cyrll Ward, daughter of Mes. Margaret Ward, of this city, were married in Sase York Tuesday, February 11, 1902. to the north are two furnaces, with the gigantic stores rising beside them. There will be at least five of these furnaces; perings more. At present two are practically complete, and work is being

1.4 326 Lackawanna avenue. El Belmont cigar, finest Havann el-

the region. The failure of most Buffatonians to grasp the importance of the enterprise or to real-ize the stimendousness of the undertaking is due in a great measure to the deliberate reifecance of the steel plant officials, and to the natural tendency of people to absorb great things slowly. The steel plant men are naturally taciturn about their affairs, as are all good business men, and when they have time to talk, which is not often, they talk about other people's business and give rest to their own. Of course, it is easy gar on the market. The trade supplied at \$55 per M. Coursen,

biggest building now up is the foundry building, which is 550 feet long and about 60 or 70 feet bigh. It is an arched structure, with a root studded with glass panes, one side literally in-laid with windows—in this side there are exactly 11,305 panes of glass—and a chanliness of as-pect seldom noted in manufacturing buildings. The roll shop standing near by, and running par-allel to fr, is about the same length, but is lower and not quite so wide. The pipe shop, the holler house, the power house, the carpenter shop, all are chormous structures, and dotting the spaces between them are other massive, yet anali-er buildings, which are put to various uses. Off to the north are two furnaces, with the gigantic 18-Ounce Bottles 25 Cents. Worth 40c.

otwithstanding the finding of the jury in favor of the plaintiffs. The plaintiffs sued for damage done to a team and butcher wagon by being

ent and taste in all the great centers of the un

verse have been entranced by the playing of this wizard of the plano, so that it is unnecessary to speak of his work in detail.

It is not amiss, however, to state that his a

hit by a trolley car near the corner of Washington and Richmont avenues. The defense alleged contributory negligence. Judge Kelly allowed the case to go to the jury, reserving the question as to whether or not there was con-

tributory negligence. It was argued before the three judges and the motion of the defendant for judgment notwithstanding the verdict was allowed. Willard, Warren & Knapp represent-

ed the defense. George M. Watson, I. H. Burns and J. W. Browning were attorneys for the plaintiffs. This is the second time the elder Potter has been defeated in a trespass suit against the trolley company. The opinion of the superior court was written by Judge W. W. Porter,

KELLY-DONNELLY CASE. The same judge wrote the opinion in

the case of Ellen C. Kelly against Q James F. Donnelly. This is a suit over the location of a line fence, involving about an inch strip of land. The late Judge Gunster declared in favor of TSAC the plaintiff. The superior court af-firms his finding. W. S. Huslander was the attorney for the appellee, and T. P. Duffy for the apppellant. In the case of Charles Lewin against the Pauli estate, Judge Beaver's opinion affirms the verdict Mr. Lewin was given by a jury for injuries sustained by falling down a stairway in the Pauli building on Lackawanna avenue, where he had an office on the second floor. The accident was alleged to be due to the faulty condition of the stairs. The defense was that the plaintiff under the terms of his lease was responsible for the condition of the stairway, and that it was not clearly established that the condition of the stairway was the proximate cause of the injury. No one saw the accident and the plaintiff could not give testimony because the defendant had died. The testimony as to cause of accident was, in consequence, all circumstantial Ralph L. Levy and George S. Horn were attorneys for Mr. Lewin, I. H. Burns and Major Everett Warren were for the defendant. In the case of M. J. Ruddy against William Repp. the plaintiff secured a verdict for stone delivered to the Old Forge high school contractor. Zeba Van Loon. Ruddy alleged that Repp

agreed to be responsible for the stone. The case was tried before Judge Kelly. The finding of the local court is affirmed by a per curiam decision The case of Harding against Repp is one in which William Repp unsuccessfully attacked the first assessment made in Old Forge borough. H. M. Hannah was Mr. Repp's attorney and J. E. Watkins appeared for Mr. Harding. The superior court finding was per curium. THE GILBOY CASE.

The case of Dan Kislinski against Thomas Gilboy was one in which a verdict was given against the defendant for causing damage to Kislinski's lot by filling up a gully in his own, through which a stream had flowed for twenty years. The case hinged on whether or not this was a living stream or a course for surface water in wet seasons. President Judge Rice wrote the Superior court opinion. James J. O'Malley and I. H. Burns represented the plaintiff. Joseph O'Brien, Hon, M. E. McDonald and Frank M. Lynch appeared for the defendant.
