## INDUSTRIAL JOTTINGS.

States Steel Corporation Will

Build Another Plant.

Reports from Buffalo say that the inited States Steel corporation is planning to erect a big plant on Grand island, if the projected bridge between the island and Buffalo is built. The purpose of the corporation in erecting the plant is said to be to fight the Lackawanna Steel company, which has a great plant in South Buffalo.

Though it is denied that negotiations have been opened, it is said on authority that the United States steel management is not averse to taking over the American Can company on fair terms, and that it is waiting for the annual report of the latter company to aid it in estimating the value of the property. This report will be ready in about thirty days, the American Can company having completed the first year of its operations, March

It is announced this afternoon that the details of the plan for issuance of \$250,000,000 United States Steel bonds will probably be given out in a few days.

thropic objects in this country in 1961. counting only gifts of \$5,000 and upwards, as aggregating \$107,360,000, which is \$60,000,000 more than in 1900, and \$44,-090,000 more than in 1899.

Mr. Wu states that the Chinese Province of Shansi alone could supply coal to the entire world, even at the present enormous rate of consumption, for a period of 2,000 years. This was the estimate made by Baron Richtofen, the celebrated German geologist. Mr. Wu draws the practical conclusion that American enterprise has a large field in the Celestial empire, and that it is well to cultivate friendly relations with a country whose coal bin is as well supplied as that of China.

In spite of the Boer war the exports of Cape Colony, South Africa, for 1991, were \$51,000,000 against \$40,000,000 for The figures for imports are \$120,-600,000 against \$95,000,000. This gives us some idea of the chances for larger gains after the war is closed.

The first Egyptian Medical Congress will be held at Cairo, Egypt, Dec. 19-23, 1903, and indicates long strides in the propulsive power of money, which has forced the land of the Pharaohs to rise to the physical necessities of the millionaires who invade its historical scenes in flocks every year.

A remarkable evidence of the esteem in which President McKinley was held by the working people was afforded in Homestead, Pa., recently. The majority of the employed of all grades contributed half a day's pay to the Mc Kinley Memorial Fund.-Tunkhannock (Pa.) Republican.

The first statement of net earnings of the railroads of the United States for 1901, is given by the Financial Chroni-The report on gross revenues appeared some weeks ago. The net for the year, for 166,491 miles of road operwas \$528,962,185, compared with \$464,161,655 in 1900, a gain of \$64,800,530, or nearly 14 per cent. The largest monthly increase in gross was in October, of 16.25 per cent., and in net, in

A Dangerous Disease. Cronp is dangerous, but there is timely warning. The danger signal is hoarseness. A day or two before the attack the child becomes hoarse, then a rough cough appears. The following night the child has CPOHD. It can be preventedcan be warded off. There is a remedya safe one. and sure, too It never fails. It is called Chamberlain's Cough Remedy, Given, as soon as the child becomes hoarse, or even after the rough cough appears, it will prevent the attack, it has done so thousands and thousands of times and has never been known to fail, For sale by all druggists,

half a million concerns-in exact figeffective office, and though repeatedly, ures, 512,575. Save the 2.5 per cent. above and especially in the Second and Sixth noted, the whole of the thirteen thous-Assembly districts. Italians have been and millions of product is consumed nominated, they have almost invariwithin the borders of the United States. This production employes 5, \$10,598 wage earners, to whom \$2,323.-407.257 is paid. The increase in the nent place in public affairs here. value of the product was 39 per cent. since 1890, of the number of establish ment 44 per cent., and of capital invested, 51 per cent.

South Carolina has 3.763 manufacturing establishments, increase 58 per cent., with \$67,000,000 capital, increase 130 per cent. Yearly wages, \$9,500,000; ncrease, 72 per cent., and yearly profew of the theories advanced are interesting. Coal discoveries have been

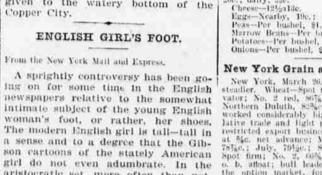

made on the mountains surrounding the city. The coal formations in all instances are said to be the same, showing that they are but branches of some main body.

In regard to the subterranean river more proofs are given. At various times wells have been dug east and west of the city which filled so rapidly that they overflowed. The number of springs near the city and the two extinct geysers some miles east of Anaconda are included in the list of items proving the underground river. In a number of places on the mountains south of the city a stream of water may be started by simply poking a stick into the ground.

Silver Lake has no known inlet or outlet, and yet at certain seasons of the year the surface of the lake is more depressed than at other times. Last summer a number of oyster shells were found by workmen excavating on the hill back of the court house, and so it goes. The theory is by no means a new one in Anaconda. It originated some months ago among those who have investigated It, and the strange supposition has never been lost sight

Especially when the wise ones have little to do are their thoughts given to the watery bottom of the Copper City.

ENGLISH GIRL'S FOOT.

aristocratic set, more often than not, she towers over the neads of foreign gentlemen. Long generations of descent from tall fathers and mothers and vigorous years of outdoor exercise

have made her what she is-very occasionally a six-footer and with hands and feet in due proportion. The note of alarm has at last been

sounded. It is held that "the daughters of Anak" are exercising too freely. if they would wear the dainty shoes that are women's traditional adorn-

ment. While the answer is made that the apparent size of the English girl's foot is due to her sensible preference New York in recent years, their great for loose, easy shoes, it is admittedly adaptability to American methods of an incomplete explanation. One reason for the growing popularity of the

American shoe in London is that it looks neater and trimmer and decidedy smaller than the English shoe of the ame size. But another reason is that the Ameri-

ably been defeated. It is also true can woman resident in London cannot that in proportion to their numbers and an English shoe small enough to Italians do not occupy a very promiit her foot. One shopper relates in a London paper that the smallest sizes The reason for this condition of afshe could find in a Regent street store fairs politicians find in the fact that were sixes. The exhibition of royal the ability to make concessions, to give relics recently opened at the new galand take, seeils to be lacking among lery furnishes interesting testimony the Italian politicians of New York. that a generous understanding is no
