## EFFECT OF THE STRIKE ORDER

NEWS RECEIVED WITH MUCH CONCERN LAST NIGHT.

It is Almost a Certainty That the Order Will Be Generally Obedied by Mine Workers—Noted Preacher Here Tomorrow—Cases in Police Court—Closing Jubilee Service. Recent Mine Accidents—Choral Society Meetings—Events of Today and Evening—Notes and Personals.

The chief topic of conversation last evening in all circles in West Scranton was the result of the miners' deliberations and their decision to suspend operations on Monday next, pending a conference to be held at Hazleton on Wednesday.

Many inquiries were made at the Tribune's branch office in Jenkins' drug store early in the evening regarding the probable outcome of the committee's deliberations, and when the bulletin was posted, announcing the decision the news caused a great commotion among those gathered around the corners of Main avenue and Jackson street.

Many opinions were expressed regarding the probable effect of the order but it is almost a certainty that the order will be religiously obeyed. There are hundreds of mine workers in West Scranton who do not favor a strike, yet they will abide by the decision of their leaders and remain away from the mines, pending a settlement.

The news of the strike was received by the business men generally with concern, particularly those who depend largely on the mine workers' trade, as it will seriously affect their interests. No one can forecast the general effect the strike will have on the community at large, as the news came too late last night to feel the pulse of the people on the subject.

Operations at the various collieries located in the Keyser Valley will practically be suspended to-day, as the semi-monthly pays at all of them will be made to-day, and on such occasions very little work is done.

The mine workers assert that the past thirty days have been the best for work that they have ever experienced in the same length of time, and it is apparent from the vast amount of

coal that has been mined and stored away on almost every available side-track the Delaware, Lackawanna and Western company could secure. Many thousands tons have been stored up at the coal storage plant near the Hampton colliery, and on the Bloomsburg division sidings from the Scranton street crossing down towards Bellevue, the six or seven side tracks have hundreds of tons of coal loaded on double hopper cars.

The demand for coal during the past week has been enormous, particularly from a local point of view, and every teamster in the city has been working overtime to supply the demand. At A. E. Robinson's Sons coal yard hundreds of tons have been stored, and they have enough coal on hand to supply their needs for many weeks to come.

The American Locomotive works have also secured a large amount of coal, which is piled up near the cliff works.
