ONLY ONE OF HER KIND. Daring Feats of Dallie Julian, Who Is with Sells Brothers' Show.

Dallie Julian is a little lady who still ears her hair in pigtail style. She is not only young but extremely pretty. She is not only pretty but she is remarkably intelligent. She is better informed on general topics than a vast majority of women of twice her age, while her manners are those of one who has descended from generations of court and drawing-room life. She is sweet simplicity itself and absolutely free from any sort of affectation.

Dallie Julian might be well imagined to be a sweet girl graduate from a preparatory school. Not yet in long dresses she is famous. And fame has not spoiled her. In her class she is at the head. Despite her youth she is at the very head of one of the most difficult of all professions in which women mgage-equestrianism. She is a circust rider. But there are circus riders and circus riders. Dallie Julian is the only rider of her sex now living who throws somersaults upon the bare back of a swiftly running horse. There have been only three of them in all circus history. She not only does this difficult thing, but does it easily and gracefully, and must be very uniucky when she does not alight squarely upon her feet and

Dallie Julian is one of the star riders of the Adam Forepaugh and Sells Enormous which will exhibit here on Tuesday, May 20, and display the greatlist of star riders that est ever been seen in any show in this country. It numbers no less than twenty-three and the managers make the astonishing claim that no other show has a rider that is the equal to any one of them. And this little girl is at the top of the list. If we are to believe the claims of the managers of the shows the greatest rider of her sex who has ever been seen on a horse is this same modest and pretty little Dallie

A Much Talked-of Improvement. The stir the New Jersey Central's reent announcement made in regard to

its hourly trains between New York and Philadelphia was far reaching. Very few cities can boast of such a train schedule and the beauty of it is, that it's easily remembered-a train every hour on the even hour from 7 a. n, to 6 p, m.

The locomotives, cars and Pullman ars are the most modern, the readbed s rock ballasted, and as only hard coal used there is no smoke or cinders. Every train runs direct to Reading Terminal, Philadelphia, without change and many of them cover the distance in two hours. The Reading route by which the Philadelphia line is often known, is not only a short way to Philadelphia but it is likewise the scenic route. This service goes into effect on May 18, but n no way does it impair the fast and elegant service of the Royal/Blue line, which will run independently of the Philadelphia line.
