INDUSTRIAL AND LABOR

MANUFACTURERS' MATERIALS IN FOREIGN COMMERCE.

The Total Exports of Fiscal Year Amounted to \$403,890,763, a Reduction of \$8,265,303 Compared with 1901-In the General Class of Manufactures, However, a Majority Show an Increase-Newton Jackson Organizing Illinois Coal Interests-Other Notes.

It is now possible to determine accurately the movements of manufactures and manufacturers' materials in the foreign commerce of the United States during the fiscal year 1902.

The June report of the treasury bureau of statistics, showing the imports and exports by articles for the month of June and for the entire year compared with preceding years, has just been completed and given to the public. It shows that the total exports ings for the corresponding period last of manufactures are \$403,890,763, against \$412,155,066 in 1901, a reduction of \$8,-

In iron and steel manufactures alone the exports have fallen from \$117,319,-120 in 1901 to \$98,552,562, a reduction of 118,766,758. Thus the decrease in iron and steel manufactures alone is ten million dollars greater than the total reduction in exports of manufactures, indicating that in other articles there has been a net increase.

Taking the general class of manufac-tures exported, it may be said that a majority show an increase in 1902 compared with 1901, while some of the articles showing a decrease in value of exports show an increase in quantity, indicating that the reduction is due in some cases to reduced prices and not to reduced exports. In copper, for example, the exportation of ingots, bars, plates, etc., amounted in the fiscal year 1902 to 288,720,655 pounds, against 252,-769,328 pounds in the preceding year, an increase of 35,951,329 pounds while the value was in 1902, \$39,190,619, against \$41,260,376 in 1901, a reduction of \$2,069,-

TABLE OF EXPORTS.

The following table, prepared by the treasury bureau of statistics, shows the exports of the principal manufactures. and includes all articles or groups of articles the exports of which in 1902 exceeded \$1,000,000. The figures for 1902 are compared with those for 1901, and thus present in concise form an analysis of the export trade in manufactures in 1902 compared with 1901:

Exports of principal manufactured as ticles from the United States, during fiscal years 1901 and 1902, in order of mag-nitude in 1902.

This and That.

The purchase of a large iron ore deposit in Utah is reported, and Pennsylvania capitalists have paid \$2,250,000 for the land.

The Coal Trade Journal says that from a money standpoint the strike in the anthracite region is a losing venture to the miners, as the wages lost by idleness amounts to \$12,000,000. The American Car and Foundry company's earnings for the dividend quarter ended May 2f amounted to \$2,008,000. which sum is nearly double the earn-

Orders for steel rails for 1903 delivery continue to increase. The principal mills, it is said, have orders booked for an aggregate of more than 1,000,000 tons. The Atchison recently placed an order for between 50,000 and 60,000 tons. and the Burlington is believed to be in the market for not less than 50,000 tons.

FUTURE OF THE LAW.

It Is Rapidly Forcing Its Votaries to

Become Specialists. From "The Decline of the Practicing Lawyer" by H. Gerald Chapin in Suc-

It may seem a gloomy and hazardous prophecy to say that, within twenty years, the individual or general-practice attorney will be extinct, save only in the remoter country district. Yet, after observing the trend of events for a number of years, and listening, as the author has, to the stories of many hundreds of attorneys throughout this

country, he is forced to this conclusion, Deduced to a chemical formula, conputed on a scale of ten, the sum of legal business may be said to be compounded of the following:

Real estate 3 parts. Corporations Commercial cases and "collec-Wills and administration of es-Defense of criminals "

Fifteen years ago, real estate practice

was the most lucrative of the calling. Ten thousand dollars a year was looked upon as a very small income for a lawyer who made it his specialty. following practically ceased with the organization of title-insurance companies. Their fees are less than the individual lawyer can afford to accept, their staff comprises counsel of the highest skill in this particular line, and, best of all, from the layman's standpoint, the company's financial responsibility is unquestioned in case an error is made. It is quite true that there now exists certain law firms claiming to do a real estate business; but, in nearly every instance, it will be found that their work is loaning funds of clients or of members upon bonds and mortgages. But even the "loan" business has been cut into by the title corporations, many of which are now engaged in selling bonds and mortgages of which they guarantee payment of

principal and interest. One of the few strongholds in the real estate line still left to the lawyer in a large city is the representation of clients whose property is being condemned for the opening or widening of streets. This is usually done upon a contingent basis, the attorneys receiving a percentage of the amount reexceedingly keen, and it not considered beneath the dignity of a most reputable firm to employ agents for the purpose of obtaining contracts from property owners, the moment proceedings are considered. Certain changes which will materially interfere with the pursuit of this line of business are, however, being discussed by many mun-

cipalities. Corporations have ceased to be appreciable factors, owing to the organ-ization of various "incorporation companies," one of which, for fifty dollars vicinity of Springfield, Ill., controlled plus state fees, will organize a com-York. The new combine will have a for directors' meetings, write the mincapital of \$12,000,000, the output of the mines being about 4,000,000 bushels a attend to the various details which the year," said Mr. Jackson. "I am going particular state statute makes obligatory.

WELL-KEPT HANDS.

Over my sink are two bottles and a nafi-cleaner. One bottle contains five parts of lemon juice to one of alcohol, which will keep indefinitely. other contains the following lotion: One fourth of an ounce of gum tragacanth added to one pint of rain-water, which has stood three days, then one ounce each of alcohol, glycerine and witchhazel, also a little good faint perfume. After washing dishes or preparing vegetables I apply a little of the lemonjuice, then the lotion, and in a mom-ent my hands are dry, soft and very smooth. All stains disappear as if by magic, and the nails are cleaned easily. The time required is not over two minutes. This process repeated five or six times daily will certainly repay housekeepers, for what is there more indicative of refinement than well-kept ands? Then, too, the expense of these lotions is comparatively nothing. Be sure to have them in a handy place.—

SOFT COAL IN **METROPOLIS**

NEW YORK IS ENGULFED IN A CLOUD OF SMOKE.

the Immense Sky-Scrapers Have Been Lost Sight of from the Jersey Shore-Principal Theatrical and Sporting Attractions of the Day-Where the Visitor Can Find Rest and Recreation Along the Atlantic Coast.

From a Staff Correspondent.

New York, Aug. 3 .- If the mine workers of the anthracite coal regions could see the effects of soft coal on the metropolis, they would, perhaps, have some sympathy for the afflicted Gothamites and immediately return to work. Such a volume of dirty, obnoxlous smoke that hangs over the city every day is a source of much annoyance to visitors and a continuous nuisance to the people on the island of Manhattan. It places New York in the same category as Pittsburg and Chicago, as far as this public necessity affects the health and comfort of the people.

It can safely be said that scarcely pound of anthracite coal is in use in New York, outside of what is being mixed with the bituminous and burned in locomotives running in and out of New York. The traffic on all branches of the elevated railroads in the city has been seriously affected by reason of soft coal being burned on the engines, and volumes of the smoke arise constantly from every ocean liner, pleasure boat, barge or tug on the North and East rivers. From every smokestack of industry there issue dally the same cloud of thick, murky smoke, which settles with nauseating effect on everybody and everything in sight.

The effect of the smoke on the city can best be seen from the deck of a steamer coming up from Sandy Hook It has the appearance of the city being enveloped in a fierce conflagration, with the smoke that follows arising in dense volumes high up in the air, completely overshadowing the immense sky-scrapers which are such conspicuous monuments to the progress and enterprise of New Yorkers. Even the great Brooklyn bridge is lost sight of n the fog, and on a cloudy day New York is practically "out of sight" of either the New Jersey or Brooklyn shores.

GAINED A FOOTHOLD.

It is certain to the casual observer that the product of the bituminous coal fields has gained such a foothold over anthracite in New York, now, that it will be a hard matter to regain the trade of former years along this line. The introduction of gas ranges has also opened up a field in which anthracite has heretofore had comparatively little opposition. But with all the disparaging effects of the bituminous product on the metropolis, there is always 'something doing" to engage the attention of the visitor.

Hundreds of substantial buildings are in course of erection, notable among hem being the famous "flat iron," at Broadway, Fifth avenue, Twenty-sec-ond and Twenty-third street. The subway for the underground railway system is progressing rapidly and commands much attention from spectators. Thousands of tons of rock are being excavated to make room for this wonderful improvement, and some 10,000 orkmen are engaged in carrying on the work, which will be completed in two years from now.

The attractions at the theatres are rather limited, the principal plays being "The Defender" at Square, and "A Chinese Honeymoon" at the Casino. The former is a new musical yachtical extravaganza, which covered. Competition in this field is has made the biggest hit of any similar production in years. The cast includes such well-known artists as Paula Edwards, Emma Carus, Blanche Ring, Edith Eldridge, Sandol Milli Ken, Amy Ashmore, Maym Kelso, Grace Spencer, Alexander Clarke, Harry Davenport, Richie Ling, George Allison, Gordon Tomkins and Gilbert Clayton. music, chorus and solo work, together with the scenic effects of the production are superb and the show is des-

tined to have a long run. The successful English musical "A Chinese Honeymoon," is comedy, one of the prettiest and most tuneful light productions ever seen in New The cast includes Thomas Q. Seabrooke, Edwin Stevens, William Burress, William Pruette, Van Renssalear Wheeler, Adele Ritchie, Amelia F. Stone, Aimee Angeles, Mrs. Annie Yeamans, Katle Barry and others.

AS TO BASE BALL.

Just now the New York and Brooklyn base ball teams are attracting unusual attention, the former by reason of the fact that McGraw has rejuvenated the team and injected new life into its work, and the latter on account of the manificent uphill fight it is making for leadership in the National league

In one week recently these two teams played to an aggregate attendance of nearly 100,000 for six games. New York now has the best pitching corps it has had for years, and their fielding is grand, but their stickwork is rather "Jack" Dunne, of Scranton, light. and Christy Mathewson, of Factoryville, are with the team, the forme playing right field, and the latter taking his regular turn in the box.

The Brighton Beach races attract thousands of people to the seashore every day, and the multitude of bathers at Manhattan, Coney Island and Rockway attest the never-waning popularity of these resorts. The principal attractions on the island are Santos Dunont's air ship and the "steeplechase." the latter containing a number of Pan-American attractions, including the House Upside Down and a Trip to the

The most enjoyable boat trips are to Glen Island, Rockaway Beach, Atlantic Highlands, and up the Hudson to West Point or Poughkeepsie. Any of these can be taken in the day time, affording relief and pleasure from the sultriness of the city life. The trolley ride to Brighton Beach is also a source of much pleasure and a view of the new uptown bridge across the East river can be had from the foot of East Twenty-third street or Broadway Brooklyn ferries. W. R. H.

Interested.

It was at the Literary club reception. "Which do you consider the best novel of the year?" said the guest of the evening to the long-haired young man whose name he had failed to catch. The longhaired youth hesitated. "Perhaps I'd better not commit myself," he said with a slight hesitation. "Why not?" queried the guest, "Because," replied the youth, "I wrote it."—Cleveland Plain Dealer.

ITCHING BURNING AND SCALY ERUPTIONS OF THE SKIN SCALP AND BLOOD WITH LOSS OF HAIR CURED BY CUTICURA.

The agonizing itching and burning of the skin, as in Eczema; the frightful scaling as in psoriasis; the loss of hair and crusting of the scalp, as in scalled head; the facial disfigurement, as in pimples and ringworm; the awful suffering of infants, and the anxiety of worn-out parents, as in milk crust, tetter, and salt rheum,—all demand a remedy of almost superhuman virtues to successfully cope with them. That CUTICURA remedies are such stands proven beyond all doubt. No statement is made regarding them that is not justified by the strongest evidence. The purity and sweetness, the power to afford immediate relief, the certainty of speedy and permanent cure, the absolute safety, and great economy have made them the standard skin cures and humour remedies of the civilized world. skin cures and humour remedles of the civilized world.

COMPLETE TREATMENT \$1.00.

The treatment is simple, direct, agreeable, and economical, and is adapted to the youngest infant as well as adults of every age. Bathe the affected parts with hot water and CUTICURA SOAP, to cleanse the surface of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply CUTICURA OINTMENT freely, to allay itching, irritation, and inflammation, and soothe and heal, and lastly take the CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. This sweet, wholesome treatment affords instant relief, permits rest and sleep in the severest forms of eczema and other itching, burning, and scaly humours of the skiu, scalp, and blood, and points to a speedy, permanent, and economical cure when all else fails.

Millions of Women Use Cuticura Soap Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chaffings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the tollet, bath, and nursery.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odorless, economical substitute for the celebrated liquid Cuticura Resolvent, as well as for all other blood purifiers and humour cures. Each pill is equivalent to one teaspoonful of liquid RESOLVENT. Put up in screw-capped pocket vials, containing 60 doses, price 25c. CUTICUEA REMEDIES are sold throughout the world. SOAT, 25c., OINTHENT, 55c., PILLS, 25c. British Depots 27-38, Charterhouse Sq., London. French Depots 5 Rue de la Paix, Paris. POTTER DRUG AND CHEM. CORP., BOIS Props., Boston, U.S. A.
