INDUSTRIAL AND LABOR

HOSPITALS FOR TREATING EMERGENCY CASES.

of the Plants of the American Steel Wire Company-United States Now Has Over 200,000 Miles of Railways-Rumors of Closer Relations Between the Western Union and Postal Companies-That Board for Today.

A hospital for the treatment of emergency cases will be established on the grounds of each of the twenty-two plants of the American Steel and Wire company. The plans for the buildings, which will be as nearly uniform as conditions will permit, are being prepared by a Philadelphia architect, and the total cost to the company of buildings and equipment will not fall short

The determination of the company to establish a hospital at each one of its plants was arrived at after a year's experiment with a temporary emer-gency hospital, erected for the company in Allentown. Little was said of the new movement at the time the Allentown hospital was put into service and few persons outside of the officials were aware of the company's intentions. It did not require a full year to prove the inestimable value of such an institution, either in point of bodily comfort to the unfortunate iron workers who were forced to enter it for treatment, or in point of ultimate expense to the corporation. For the last several months the company has been shaping its plans for hospitals at all N. Y., vice A. H. Swarz, who has reits plants, and it is calculated that signed to engage in private business. within the next six months all will be ready to receive patients.

Each hospital will be of plain brick construction, two stories in height, and WASHERY WILL with baths, sitting rooms, library, dining room and sleeping apartments for the nurses, will have quarters for six beds, that number being figured as the maximum of cases that may need attention at the same time. In addition to these departments, there will, of course be the regulation dispensary for the use of those employes who may need medical attention, or who are not so seriously injured that they may not be treated at home.

A corps of six nurses and two druggists and thorough ambulance service will be requisite for each hospital, in addition to the resident physician.

There are three plants of the company in Pittsburg, and one each in Allentown, Joliet, Ill.; Cleveland, O.; Fall River, Mass.; Detroit, Mich., with the others scattered throughout the East.

Railroad Building.

The beginning of the second half of 1902 sees the railroads of the United States cross the 200,000 mile line. Construction during the past six months was not especially active, though it was larger than last year's corresponding time, but the total which had been reached by the end of 1901 was so near the 200,000 mile mark that that line was certain to be passed long before 1902 neared its close. It is only by comparing this mileage

with that of some of the rest of the great countries that the American people can fully realize the tremendous development which has taken place in this field in their own land. Figures of railroad activities of the world at large are not very trustworthy, but taking those which are most recent and reliable, the United States is seen to be far ahead of any other country Germany has about 32,000 miles of

main track; Russia, 29,000; France, 27,-000; Austria-Hungary, 23,000; Great Britain and Ireland, 22,000, while no other European country has as many as 10,000 miles. All of Europe has about 175,000 miles of road, or considerably less than the United States, while the entire world's mileage is approximately 500,000, of which the United States furnishes two-fifths.

All this railroad construction has come in about two generations of time. When John Stevens, in 1822, got a charter from the Pennsylvania legislature to build a railroad from Philadelphia to Columbia on the Susquehanna (which was never built) some body asked one of the Pennsylvania papers, "what is a railroad, anyhow?" The editor gave it up, but said that "perhaps some other correspond-ent can tell." It is only seventy-four years on the Fourth of July since work was started on the construction of the first of America's great roads; it is only fifty-one years since the waters of the West at Lake Erie were first reached by through rail from the Atlantic coast, and as recently as Appomattox there were only 32,000 miles of main track in the whole country, compared with 200,000 miles now.

Closer Relations Rumored.

Rumors of closer relations between the Western Union and the Postal company were again current yesterday but as heretofore denied. On this subject an interest having means of getting at the facts said:

"It was a fundamental proposition that there could be no consolidation or combination of the Western Union with the Postal while Mr. Mackay was at the head of the Postal company. Antagonisms were too deep-rooted. The relations between other members of the Mackay family and the Goulds have, however, been very different, and while they do not perhaps justify belief in any external change in the relations of the two companies, they carry a suggestion of personal relations which are often influential in business affairs. People have bought Western Union lately on belief that events are now possible which were not possible while Mr. Mackay lived, although that is not saying that such events are even contemplated at present."-Philadelphia Stockholder.

Effect of the Strike.

Idleness at anthracite mines continues the only disturbing element in the world of constructive industry. Owing to the fact that most mills and factories using hard coal had stocked up heavily in anticipation of the labor

Mrs. Mollie Allen, of South Fork Ky., says she has prevented attacks of ky., says she has prevented attacks of cholera morbus by taking Chamber-lain's Stomach and Liver Tablets when she felt an attack coming on. Such attacks are usually caused by indigestion and these Tablets are just what is needed to cleanse the stomach and ward off the approaching attack. Attacks of hillous colic may be prevented in the same way. For sale by all druggists.

struggle, there has thus far been comparatively little serious interruption to manufacturing, but the end of supplies

cannot be far off. Pig iron furnaces have been comselled to close, the weekly output on August 1 being 336,465 tons, according to the Iron Age, against 350,890 on July 1. Compared with the production prior to April 1, however, there still appears They Are to Be Established at All gust 1 were 74,130 tons, a slight decrease during July.-Dun's Review.

D., L. & W. Board for Today. The following is the make-up of the Delaware, Lackawanna and Westerr poard for today:

MONDAY, AUGUST 18. Summits West-8 a. m., Carrigg.
Pushers-7 a. m., C. Bartholomew; 8 a.
m., Houser; 11.45 a. m., Coslar; 7.30 p. m.,
Murphy; 9 p. m., W. H. Bartholomew.
Helpers-1.30 a. m., Case; 7 a. m.,
Lamping; 10 a. m., Lattimer; 3.15 p. m.,
Stanton.

Rowe will run Barber's crew two round day, August 18.

The 11.30 p. m. extra east, Sunday, August 17, is annulled. Castner will run O'Hara's crew on work train Monday, August 18, and until fur-

ther notice. Randolph and crew will run Nealis' run one week, commencing Monday, Aug. 18. Carmody and crew will run No. 55 Mon-Leonard and crew will run No. 57, Mon-

Monday, August 18. This and That.

Loughney and crew will run No. 56,

Riley Williams has been appointed superintendent of the Bangor and Portland division, with headquarters at Nazareth, Pa., to succeed H. H. Shepherd, transferred.

H. H. Shepherd, of the Lackawanna railroad, has been appointed superintendent of the Syracuse and Utica divisions, with headquarters at Syracuse,

BE RESTARTED

[Concluded from Page 5.]

docks are about cleaned up. In Chicago territory demand has strengthened. Possibly half of the docks are now bare of anthracite, and shipments by rail to outof-town points have almost stopped, while orders for future delivery are refused. It is believed, however, that if retail dealers are conservative there will be no real stringency until after Christmas. Milwankee is worse off than Chicago as regards supplies of anthracite.

Along the lower lakes and in the all-rail

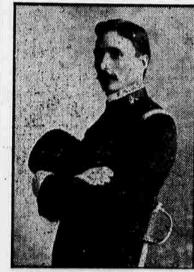

trade the substitution of bituminous or coke for anthracite is becoming more marked. Along the Atlantic scaboard supplies are more plentiful some distance from New York than near the city, as New York dealers have been picking up all the coal they could get at points not too remote. At Boston trade is light, both wholesale and retail. At Philadelphia public buildings are to burn bituminus, and its use is increasing.

The following retail prices are noted: Duluth, Minn., \$7.50 for domestic sizes and \$6.50 for pea; Battle Creek, Mich., \$8; Houghton, Mich., \$7.25; Sloux City., Ia., \$10; St. Louis, Mo., \$8.50, with Arkansas semi-anthracite, \$6.75; Bath, Me., \$8; New York City, \$9, pea \$6.50, with dealers claiming to pay \$8.25 and \$8.50 alongside for domestic sizes; Philadelphia, \$9 for broken, \$8 for egg and stove, and \$6 for pea; its is said best screened Welsh an thracite has been offered at Philadelphia for \$6.88 delivered. At Richmond, Va., prices have not advanced, and dealers ask \$6 for domestic sizes. At Norfolk \$8 is asked, and at Raleigh, N. C., \$8.50.

TEAM LEAVES TODAY.

Inspector of Rifle Practice Carter and His Men Start for Mt. Gretna This Morning.

Lieutenant Lewis B. Carter and the rifle team of the Thirteenth regimen will leave the city at 6.38 o'clock this morning, over the Delaware and Hud-

LIEUTENANT LEWIS B. CARTER

son railroad, for Mt. Gretna, where the state rifle matches are to be held this

Lieutenant Carter stated last night to a Tribune man that he considers his team a splendid one, and expects that it will finish well up among the regiments of the state. Throughout the practice shooting, the five men composing the team have maintained an average of almost ninety, which is

exceptionally good shooting. Major Frank Robling, Private John Burns, of Company A, and Musician Charles Moore have been pretty well tied for prowess with the Krag-Jorgenson, and Sergeant Peter Robling and Private Lawrence Brink, the remaining two men of the squad, are shooting about even. Major Robling will shoot as last man and Private Burns will

head the list. Major Robling will also represent the egiment in the revolver matches. Last year Lleutenant Franklin Henshaw, of Company F. won the pistol trophy, and as Major Robling is considered his equal with the revolver, the Thirteenth ought to draw another prize this year.

RELIGIOUS NOTES.

Rev. J. A. Rankin filled the pulpit of he Second Presbyterian church yesterday norning. There were no evening services. Rev. Clarence J. Benjamin last night filled his father's pulpit in the Asbury Methodist Episcopal church and delivered a highly interesting sermon.

THOSE THAT LIVE BY FAITH

THEY ARE FOUND IN ALL WALKS OF LIFE.

So Said Rev. E. B. Singer in a Sermon Delivered Last Night in the Elm Park Methodist Episcopal Church-Faith Alone Endureth Time, He Said-Spiritual Life Needs to Be Used if We Would Develope It-Destiny of All Fixed by

Rev. E. B. Singer, the assistant pastor of the Elm Park Methodist Episcopal church, preached a forceful sermon in that church last night basing his remarks on Hebrews 1038: "Now the Just Shall Live by Faith." He spoke in part as follows:

"Let us first look at this text by considering who are the just. line which marks the separation beween the just and the unjust runs not parallel with the lines which divide society into classes. In society we have the upper classes and lower classes but the just may be found among the rich or the poor. No one knows where the line should be drawn except God because being just means being right with God. * * * Those who are just are those who have proven their worth, who have earned their spurs.

"The just shall live. The life that s referred to here is the spiritual life, the life which those who have come in ouch with God experience. It is a mistake to assume that those who once come in touch with God are always in

DEPENDENT UPON GOD. "This is not true. They are at all imes dependent upon God and unless hey pay constant attention they may ose this grace before they know it.

God is the source of all grace and we must at all times keep close in touch with Him if we would keep it. "We must constantly resist evil if ve would preserve ourselves. This spiritual life must be used if we would develop it just as our muscles, must

be exercised. We must do our duty as

we see it though it mean ostracism. suffering or loss. "Faith, we are told, is the substance of things hoped for. It is nothing that we can grasp or feel or see and yet how many of us are living by it just as Paul says. The atheist and the infidel scoff at the man of God who sets out toward an unseen goal with the compass of faith to direct his course

eross the sea of life. "As we look about us we wonder if here is aught that endures, if there is anything that is staple. Generations ome and go and nations hold sway for a time and then sink and decay. Amid all the debris and wreckage of life only aith endures.

LIVE BY FAITH.

"The just shall live by faith. We shall live by faith. We shall walk by faith and materialistic changes shall not destroy our hope as we go on. As we grow older, if we are with the just, we shall find the world with its allurements and temptations going farther from us until at last the body returns to the dust from whence it came. The real God who rules the world and who will never leave us. The ocean may seem trackless and there may be no lighthouses to guide us on our way but we will know that we are bound for a goal and we will understand that our destiny is as truly fixed as God is

An interesting and enjoyable accessory to both of yesterday's services as the work of the male quartette, composed of Messrs. Jones, Wynkorp, Thomas and James Watkins, and of the acting organist, Mrs. A. L. W. Price, who is officiating during the absence of Mr. Pennington.

ARE ALL OUT OF DANGER.

Poisoning of the Babcock Family Was Due to Creamed Potatoes Kept in Damp Cellar.

Maxwell Babcock, the young son of Mr. and Mrs. H. F. Babcock, of Church venue, recovered consciousness at 5 o'clock yesterday morning, and is now pronounced out of danger by Drs. J. W. Coolidge and Theodore Sureth, who have been treating the Babcock family, since they have suffered from the poison onsumed with their Thursday night

Mr. and Mrs. Babcock, and the eldest on, Tracy, were out of danger Saturday, but young Maxwell fell into a stupor Friday night, and for awhile his recovery was despaired of. The physicians are now practically certain that the cause of the poisoning can be directly attributed to creamed potatoes eaten Friday night. These had been kept for eighteen hours in a badventilated refrigerator, in a cellar which on examination by the two doctors showed to be exceedingly damp and unhealthy, as a result of the recent heavy rains, which had partly flooded it.

"The poison generated, under circumstances of this kind" said Dr. Coolidge yesterday to a Tribune man "is absorbed quickly by milk, and it is for this reason that the creamed potatoes proved so injurious. These damp cellars are certainly a great menace to the public health, and I believe that a good deal of disease will yet result from families eating food kept in them."

The poison contained in the potatoes is of a ptomaine nature, developed by the moisture laden air. Its composition is exceedingly complex, and both Dr. Sureth and Dr. Coolidge state that the case presented the most unique features of any poisoning they had ever er

YOUNG MAN DROWNED.

Charles Woelkers, Jr., Met His Death in Lake Ariel. Charles Woelkers, jr., aged 20 years,

of Jessup avenue, Dunmore, formerly South Scranton, was drowned in Lake Ariel on Saturday. He went to the Lake on the excursion of the Junior Mechanics and went out rowing with a friend.

His hat blew off into to lake, and in endeavoring to recover it, the boat was apsized. Woelker's companion could swim and managed to grasp the overturned boat, but Woelkers sank, after naking a frantic effort to sustain himself above the water.

Efforts made to recover the body were unsuccessful and a diver was sent for. He arrived from New York yesterday, but will be unable to make the descent until today, because his diving apparatus was shipped to the
