Marriage of Miss Margaret L. Reese to John F. Durkin in St. Patrick's Church—Damage by Yesterday's Storm.

At 7 o'clock yesterday morning occurred one of the prettiest church weddings of the season, when John F. Durkin, son of Professor P. F. Durkin, of North Rebecca avenue and Miss Margaret L. Reese, daughter of Mrs. Mary Reese, of North Fillmore avenue, were united in marriage. The wedding was one of the largest yet held in St. Patrick's church and the sacred edifice was crowded to the doors by friends who came to witness the happy event. At precisely 7 o'clock Miss Johnson commenced to play the wedding march from Lohengrin, and as the strains floated over the church the bride and groom entered and slowly marched up the main aisle to the altar rail, where they were met by Rev. J. B. Whelan, who performed the ceremony and afterward sang a high nuptial mass. During the ceremony the organist rendered Mendelssohn's "Ave Verbum," and Mendelssohn's march was played as a recessional. The bride was attended by her sister, Miss Marie Reese, and Thomas J. Fleming acted as best man. The bride was beautifully gowned in French lawn with applique trimmings while her maid was attired in white organdy. Each carried a prayer book. Patrick F. Durkin and David Reese, acted as ushers.

At the conclusion of the ceremony the contracting parties were driven to the home of the bride's mother, where a reception was held and a wedding breakfast served. At 1:55 Mr. and Mrs. Durkin left via the Lackawanna for Richfield Springs, Albany and points of interest on the Hudson. Upon their return they will reside in West Scranton.

Both the young people are well known and highly respected among a large circle of friends, having resided here all their lives. Mr. Durkin is employed in a responsible position in the Lackawanna car records office, while Mrs. Durkin, before her marriage was bookkeeper for the Atlantic and Pacific Tea company. They were the recipients of many beautiful presents from friends and admirers who wish them every success in their happy married life.

DUNMORE DOINGS.

Borough Council Is Deadlocked on the Question of Awarding Contract for Sewer.

The borough council held a short and exceedingly interesting session at the borough building last evening, with all members present. The purpose of the meeting was to consider the awarding of a contract, but the large number present were unable to agree as to the lowest and most responsible bidder, Donohue & O'Boyle and M. J. Gibbons, of Scranton. Mr. Brogan dissented from the committee's finding that Donohue & O'Boyle was \$7,538.55 and M. J. Gibbons' bid was \$7,534.35. A resolution was introduced by Mr. McLaughlin, awarding the contract to Donohue & O'Boyle, but the motion to adopt was lost. Messrs. McLaughlin, Brogan and Donohue being in favor of, and Messrs. O'Boyle, Conry and McAllister against. Mr. McAllister then introduced a resolution awarding the contract to M. J. Gibbons, but the vote remained the same and the resolution was lost.

The matter upon which the members appear to be divided is in the amount of rock to be removed. The estimate of Ernest Engler, Knight gives 48,000 feet as the approximate quantity. Donohue & O'Boyle's bid was 35c per foot for rock work and Gibbons' price was 60c per foot. While the total figures show O'Boyle & Donohue to be about \$7,000 low, it is claimed by the friends of Gibbons that the amount of rock estimated is 50,000 feet, and that the price of rock, which is more likely, would bring the bids less than \$100 apart.

The bid of the Joseph Hendler Construction company, Wilkes-Barre, was not considered, as the sewer committee had decided that they were not responsible, owing to their being now engaged in some litigation in Luzerne county. It was understood that, as matters stand, their bid is the lowest before council, their price for rock work being 25 cents per foot. It would seem that their certified check for \$50, to be forfeited in case of their failure to execute a contract and give a \$20,000 bond within ten days should be a sufficient guarantee to justify the council in awarding them the contract, and then, in the event of their failure to qualify, the certified check would be forfeited, and any additional expense that might be incurred.

FEDERATION OF LABOR.

Something About the Biggest Labor Union in the Country.

Ray Stannard Baker in World's Work.

The greatest of all American organizations is the American Federation of Labor, of which Samuel Gompers is president, with headquarters in Washington. A great combination of national and international unions, with yearly conventions of delegates, a staff of well-paid officers and organizers, an extensively circulated magazine, the federation includes nearly all the great national and international unions. The American Federation of Labor was founded in 1881 and is now made up of eighty-two national and international unions, composed of 9,484 local unions, 16 state federations, 296 city central labor unions, and 1,051 local unions not attached to national bodies. The total membership is over 1,250,000—a body of men united for the single purpose of advancing the cause of labor, and yet taking no political action. This number represents something more than three-quarters of all the trade unionists in America.

United States congress, in harmonizing and directing union effort in the struggle common to all union labor; in using its influence in securing the use of union label goods and in behalf of certain kinds of strikes, and in urging upon labor everywhere to refuse to purchase goods manufactured or sold by "unfair" concerns. Every month a long list of these "unfair" houses are given in the American Federationist under the heading, "We Don't Patronize." Not infrequently it is able to prevent ill-advised strikes.

The Federation has been instrumental in securing the passage of many laws which have greatly improved the condition of American workmen. A bare list of them is evidence enough of the remarkable rise in standards during the last twenty-five years of wages, comfort and independence among the workers of the country.

CARE OF BUSH-FRUIT.

How Blackberries, Raspberries and Dewberries Are Given.

Intelligent pruning is imperative to any success in the growing of the bush fruits. On the newer wood the fruit is borne, and the old wood should be cut away as soon as its usefulness is past. Then one must limit the number of shoots that arise from the crown in order that the

plant may not be choked with too much growth. In all the bramble fruits—blackberries, dewberries—the wood bears but once. Let us suppose that the shoots arising from the crown in the spring of 1902. It is well to pull out all but four or six of the strongest. By fall these shoots or canes have reached their full stature. In 1901 they will bear their first and only crop. After the crop is off—before the following spring—they should be cut out entirely. In the meantime—in the spring of 1901—another crop of shoots has arisen to bear in 1902; and thus the annual succession goes on. Currents and gooseberries will bear in the same wood two or three years, but pruning should keep the bush in constant process of renewal from the root. Add to this ample cultivation of the soil, and a full-ripe berry of any of these sorts far exceeds its wild prototype.—Country Life in America.
