## E. F. Hartman Caused the Arrest of Edward Shruler on a Charge of Malicious Mischief—Mrs. Catal Injured.

E. F. Hartman and wife, of 230 North Ninth street, appeared before Alderman Kellow yesterday afternoon and swore out a warrant for the arrest of Edward Shruler, living in the other side of the house in which the prosecutors live, on the charge of malicious mischief. The clothes were all dropped in the mud, and then the defendant stole several articles of wearing apparel.

### ELECTRICITY AND MILK.

**What It Is That Causes the Latter to Become Sour.**

From the Lancet.

During recent electrical disturbances in the atmosphere it is well known that beer may become "hard," milk may go sour, and meat may frequently "turn." A question has arisen as to whether this is due to the cause of this change. It has been suggested that an ozonized state of the air due to electric discharge has something to do with it, or that the formation of nitrous acid in the air is responsible for the change. It is, however, not probable that the atmosphere undergoes any chemical change sufficient to account for the extent to which certain foods "turn." Moreover, any important quantity of ozone or nitrous acid would be calculated to exert a preservative effect, as both are powerful antiseptics.

### DAMAGES FOR NOISE.

**Costly Decision in Case Against Boston Elevated Railway.**

By Exclusive Wire from The Associated Press.

Boston, Aug. 20.—Chief Justice Mason in the superior court today decided adversely to the Boston Elevated Railroad company a test case upon which depends the collection of many thousand dollars' damages from the railway on account of the noise incident to its operation. The case is that of one Baker, a property-owner, against the railroad company.

The decision affirms that where property is damaged by the construction of a railway the owner can recover damages for the noise incident to the operation of the road. In this case he finds that one-half the damage to property is due to noise. The decision is regarded as most important, and if it is sustained by the higher court, will largely increase the sums to be paid by the elevated railroad company, which already amount to millions. The case was tried by special assignment before the chief justice last June. Justice Mason said he had taken special pains to consider all cases cited by counsel, as the case would, of course, be taken by appeal to the full bench of the supreme court.
