Simon Richards, of Shickshinny, an em ploye at the Avondale colliery of the Delaware, Lackawanna and Western was badly burned about the hands body yesterday afternoon, while fighting a fire in the mine. He was re-moved to the Moses Taylor hospital. His burns, thought painful, will not prove fatal

Remains Were Identified.

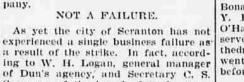

The man who was killed late Monday night by a Delaware and Hudson train near the Dodgetown crossing, was yes-torday identified by friends as Michael Kost, of 249 First street. A wife and A wife and family in Poland survive him. His fu-neral will be held this morning. Services will be conducted in North Scranton and interment made at Minooka

Work in Connell Park.

Director of Public Works John E Roche yesterday transferred the gang of workmen who have been employed on the Nay Aug park repairs, to Connell park in South Scranton. They were employed yesterday in grading the terrace and illing in the northerly cor-ner of the park. Today they will be put to work in the workto work in the walks. Contractor Job A. Lee has loaned a steam drill, which will be used in the work.

Seamans, of the board of trade, there has not been a business failure of any kind, attributable to any cause, since the strike began. The fear is expressed on all sides, however, that if the strike continues much longer the grocerymen in the suburbs and possibly some storekeepers in the central city will be in danger of financial collapse.

The National washery of the North American Coal company resumed yesterday, after being idle Labor Day. Manager Sharkey stated last evening that he laid off five men because of an overplus of help.

Twenty additional men were yesterday put to work at the Oxford. Manager Crawford reports that the output is now exceeding the 400-ton mark, and that if he had a few more experienced runners he could get out 700 tons a

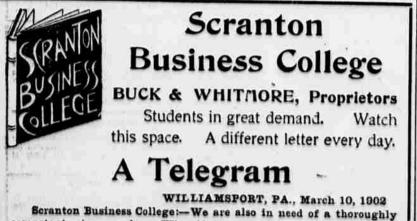

day. The running of cars is a difficult and dangerous occupation, requiring fearless and active young men. Old men can do the work, but not with anything approaching the success that

lively youths can do it. The force of successful runners, he says, is being gradually augmented, and when it reaches proper proportions. the mine will be in shape to turn out its full capacity. Owing to the scarcity of work con

equent upon the strike, the Delaware, Lackawanna and Western repair shops started on a nine-hour shift yesterday, The fact that the cars were, for the most part, idle, impelled the company to give its rolling stock a general over-

hauling. The overhauling process has now been completed and from this time on until the strike ends, a shortage of work in the repair department can be looked for.

New Industries Coming, Despite the

Strikes. One new industry of considerable proportions has recently established itself in this city, and by the time the board of trade has its first post-vacation meeting, September 15, Secretary Seamans is fully confident of being able to report the securing of another of very onsiderable proportions. The character of the latter is not as

et made public. The one already cstublished is the Scranton Varn Finishing company, capital \$50,000. It is backed principally by Scranton men. The business of this company is new to this region. Early Fall Display of **ORIENTAL RUGS**

For beauty and excellent wearing qualities, the goods produced by the inhabitants of the Orient are far superior to all others. The Oriental weaver works carefully and uses materials of honest value. Bright, cheerful colors, woven into patterns of beautiful design are a characteristic feature of their work. No two rugs are alike in point of design. Some are definite in their lines, while others are made more beautiful by their seeming lack of regularity.

Exceedingly low prices prevail on this line of goods this summer. Those acquainted with the value of the genuine Oriental Rug will be surprised at the reasonable prices we are able to quote on Daghestons, Yomuths, Anatolians, Carabaghs, Mossouls, Shirvans, Homedons, Bokharas and Antique Hall Stripes.
