Except a Surgical Operation, that Will Certainly Cure

Any Form of Piles. The study of physicians, the experiments of chemists, the loudly advertised pretensions of quacks, have been for years expended in one direction; to find a pile cure that would cure.

The results have been a number of harmless and in most cases useless ointments, suppositories and even internal remedies, which the public have weighed in the balance of experience and found wanting; nearly all of them gave some relief, but nothing approaching a radical cure resulted from these preparations.

The remedy required is one which will immediately stop the pain so severe in many cases of piles, and then by contracting the small blood vessels (capillaries) to their normal size, produces a radical cure by reducing and finally abscrbing the tumors and healing the inflamed, raw mucous surfaces. Until a few years ago, no such remedy had been produced, but at that time a suppository was placed upon the market, which has since proven itself to be the long-sought permanent cure for this common and distressing rouble; it has rapidly become famous broughout the United States and 'anada, and is now sold by all druggists under the name of Pyramid Pile

It is now the best known, because its merit and safety have advertised it wherever used. It has been advertised by word of mouth, from one sufferer to mother; people who have tried everything else, even submitting to painful and dangerous surgical operations without avail, have finally found that olles can be cured without pain and without expense practically, as the Pyramid Pile Cure is sold for the nominal price of 50 cents and \$1 per package. The Pyramid instantly stops all pain end at the same time contains no cocaine, morphine or narcotics; the acids and healing properties contained in the emedy speedily remove, cause a healthful, natural contraction and absorption of the tumors; it will cure any form of | Harry Andrus, rectal trouble except cancer and advanced fistula, which, by the way, proper and timely treatment for piles.
