THE VETERANS ARE IN THEIR ELEMENT

Davies' Post Inspection Was an Event of Importance, and Our Veterans of the Grand Army Are Proud in Their Praise of Its Brilliant Commander and His Magnificent Exemplification of the Ritualistic Work.

Wednesday night was one of delight for the hall full of veterans of the Civil war who attended the twenty-first annual inspection of William H. Davies' post, No. 187, Department of Pennsylvania, Grand Army of the Republic.

O. E. Wright was the comrade to whom had been assigned the duty of representing the department inspector general. He is adjutant of Griffin post, of Scranton, and he is conscious that his post has but few rivals in the nation for equipment and efficiency.

Captain P. DeLacy, the inspector-at-large for this district, arrived shortly after 6 o'clock, and was met at the train by Colonel McComb and Adjutant Wright. It is safe to assume that the visitors were deeply impressed by what they saw in the city, and that they were the recipients of all the courtesies which constitute a soldier's welcome.

The work of the evening began at 8 o'clock at the post headquarters on Salem avenue. At 7 o'clock the veterans began to assemble and hold their little social, to fill in the time by that happy method which was acquired when serving their country and learning to adapt themselves to exigencies of any occasion.

Commander John McComb was in his element and gave a masterly exhibition of all the work which is required of a post at its annual inspection. At the conclusion of the exercises as prescribed by the ritual, each of the visiting officers took occasion to comment on what had been done, and they expressed themselves in positive terms regarding the display which they had just witnessed in witnessing the mustering of recruits and in the complete rendering of every detail of Grand Army business. They were specific in their praise of Commander McComb for his efficiency and skill, and for his fine rendering of the obligation, the lecture and the badge presentation.

ON THE RANCH.

Western Air and Proper Food Give Long Life.

The fine bracing air of the far West is sometimes counteracted by bad food. A combination of good food and air, however, is pretty hard to beat.

Out in Wood Lake, Neb., Mrs. Paul Kennelott lives on a ranch; she has to send in to Omaha for most of the necessities of life and get her first supply of Postum in that way.

She writes that for nearly a year she has used Postum Coffee exclusively and many who stopped with her, as they frequently do on the ranch, could not tell it from the best brand of coffee. We quote a portion of her letter as her reason for using Postum exclusively in the household.

"I wish all coffee drinkers could realize how they are undermining their health by its use and would change to that best of all drinks, Postum Coffee. It is to add that we use a package of Grape-Nuts a day which will attest the favor in which the food as well as the coffee is held by my family."

A TREAT ASSURED.

Speakers and Entertainers Who Will Be Here Institute Week.

Tickets are being sold for the entertainment course in connection with the city teachers' institute, the first week in December.

As this will be the only lecture and entertainment course that Carbondale is likely to have this season and as the numbers secured City Superintendent of Schools Gary assures a treat, the entertainment will be a repetition of last year's success, when the entire seating capacity of the Grand was sold in advance.

The entertainments will be as follows: Dec. 1—Benedict, of the Edison Bros., the leading colored concert company in America.

Dec. 2—The noted lecturer, George R. Wendling. Subject, "The Man of Galilee."

Dec. 3—General Z. T. Sweeney, author, diplomat and lecturer whose subject will be "The Hock in Anglo-Saxon Civilization."

BACK TO THE MINES.

Workers in Anthracite Return to Their Toil After Five Months' Absence—Little Work Done Owing to Unpreparedness.

"Back to the Mines" was no joke yesterday. It was a stern reality, but one which the army of toilers heroically accepted with the most cheerful spirit after the prolonged illness, uncertainty and, in some cases, deprivation for the past five months. The only objection, perhaps, was among the erratic mine mules. They are ready at any time to register a kick, but they were full of them yesterday.

Though at the mines of Carbondale returned to their places yesterday, there was very little work done. But a small percentage cut any coal, and it is doubtful if there will be much coal mined this week. This is due to the lack of preparedness about the mines.

The strike ending so abruptly left but little time for the companies to get things in readiness. The chambers were in good order, but there were but few mules available by which to move the coal. The much-abused but indispensable animals had not been shod. The blacksmiths will be rushed the rest of the week and by Monday the mining of coal will be well under way.

The Delaware and Hudson and the Ontario and Western companies yesterday started in earnest the movement of coal which has been stored in cars in the yards in this city.

There was a brisk movement by the Delaware and Hudson company. The yard in the northern part of the city has been filled with loaded cars representing almost every shovelful that was in the big storage yard in Anthracite park. Five trains of possibly forty cars each were despatched northward.

The addition of employment to train crews to make this big shipment is indeed appreciable. This fact, coupled with the return of the miners, produced a joyful feeling throughout the city, that was a happy contrast to the depressed condition that has existed since the declaration of the strike. The new era of feeling that has been ushered in is manifested in various ways in every part of Carbondale. So far as is known all the mine workers who sought work were accommodated. There was no display of feeling against those who elect to remain at work during the strike. Anyhow, there were but a handful of non-union men at work hereabouts during the strike.

There is additional cause for rejoicing in Carbondale in the announcement exclusively made in The Tribune on Wednesday of the proposed erection of a breaker in the southern end of the city by the Delaware and Hudson company.

THEORIES ABOUT FOOD.

Also a Few Facts on the Same Subject. We hear much nowadays about health foods and hygienic living, about vegetarianism and many other fads along the same line.

Restaurants may be found in the large cities where no meat, pastry or coffee is served and the food cranked in his glory, and arguments and theories are digested and advanced to prove that meat was never intended for human stomachs, and almost make us believe that our sturdy ancestors who lived four score years in robust health on roast beef, pork and mutton must have been grossly ignorant of the laws of health.

Our forefathers had other things to do than formulate theories about the food they ate. A warm welcome was extended to any kind from bacon to corn.

A healthy appetite and common sense is the digestible and assimilated matter of diet, and a mixed diet of grains, fruits and meats is undoubtedly the best.

As compared with grains and vegetables, meat furnishes the most nutriment in a highly concentrated form and is digested and assimilated more quickly than vegetables and grains.

Dr. Julius Remmon on this subject says: Nervous persons, people run down in health and of low vitality should eat meat and plenty of it. If the digestion is too feeble at first it may be easily corrected by the regular use of Stuart's Dyspepsia Tablets after each meal. Two of these excellent tablets taken after dinner will digest several thousand grains of meat, eggs or other animal food in three hours, and no matter how weak the stomach may be, it will be experienced if regular practice is made of using Stuart's Dyspepsia Tablets because they supply the pepsin and diastase necessary to perfect digestion, and every form of indigestion will be overcome by their use.

The large class of people who come under the head of nervous dyspepsia should eat plenty of meat and insure its proper digestion, by the daily use of a safe, harmless digestive medicine like Stuart's Dyspepsia Tablets composed of the natural digestive principles, pepsin, diastase, fruit acids, and salts, which actually perform the work of digestion. Cheap cathartic medicines, masquerading under the name of dyspepsia cures are useless for indigestion as they have absolutely no effect upon the actual digestion of food.

Dyspepsia in all its many forms is simply a failure of the stomach to digest food and the result is a mass of the riddle and cure the dyspepsia is to make daily use at meal time of a preparation like Stuart's Dyspepsia Tablets, which is endorsed by the medical profession and known to contain active digestive principles.

Women's Gloves

It was a long time before we could get Gloves properly made for us.

Though we might choose the skins ourselves and be sure they were the best, they were often spoiled in the cutting. It has taken more work than most people care to give to get the measurements correct, and the workmanship the best. Our special \$1.00 Gloves are the American Girl.

The Jouvin, we know by comparison to be the best \$1.50 Glove made in France.

The Super Washable Glove is the finest Glove of the kind ever made.

Furs

Nothing a woman wears is more difficult to buy. Furs admit of as much doctoring as the horse that David Harum bought.

In order that you may choose safely, we have our Furs chosen by an expert who gets the pick of the world's best skins.

The new fashions and the newest Furs are ready now. As Furs are seldom twice alike, and we never know what we are going to get after the first lot is gone, the earlier purchases can be made, the better.

Union Suits for Women

Those who have worn Union Suits show their opinion of them by buying more.

They are the best fitting garment beneath other clothing—specially adapted for wear under this season's close-fitting skirts. They carry the weight from the shoulders instead of the waist and are most comfortable. A Union Suit must, of course, fit well, and accurate garments are scarce. These are correctly-shaped and true to size.

Cotton50c to \$2.50
Wool \$1.50 to \$3.50
Silk, up to \$6.50

Others in silk and wool, cotton and wool, silk and cotton.

Tailored Suits for Women

Some years ago we made up our minds that we would have the best \$10 suit for women that could be made, and we believe it is here.

For \$15 there are good suits of pebble chevrot. Fly-front jackets.

\$10 and \$15 covers most of the every-day suits. Finer suits begin at \$25—of better cloths and beautifully tailored, but still built on strictly plain lines.

Blue or black Venetian with fly-front jackets, revers of peau de soie. Silk drop lining in the skirt.

Other fine tailored suits, copies of some of the finest Paris productions, run up by easy stages to \$100 each.
