TWELVE PAGES. SCRANTON, OCTOBER 25, 1902.

REPUBLICAN TICKET.

State. Governor—S. W. PENNYPACKER. Lieutenant Governor—W. M. BROWN. Secretary of Internal Affairs—ISAAC B. BROWN.

County. Congress—WILLIAM CONNELL. Judge—A. VORSHIEG. Commissioner—JOHN COLEMAN MORRIS.

Legislative. Senator—JOHN E. JORDAN. Representatives—First District—JOSEPH OLIVIER. Second District—JOHN SCHEI ER, JR.

The Democratic leaders misjudge the miners of Pennsylvania when they imagine that the latter can be induced to repay President Roosevelt by voting to tie his hands in congress.

A Change for the Better.

THE STATES whose delegations command the greatest influence in congress are those which need their efficient congressmen more after term, thus benefiting from their experience and ripe acquaintance with public affairs.

It is not true that the Pennsylvania delegation is accustomed to lack in the ability of its members. On the contrary, their ability compares very favorably with that of any delegation in congress.

Lackawanna county is to be congratulated that under the leadership of William Connell she has abandoned the foolish and short-sighted practice of changing her congressman every alternate term.

The Sulcids of Younger.

THE CAREERS of Jesse James and the Younger brothers are strikingly indicative of the imperfect civilization of a country opening up to settlement and a regulated system of police government.

The Commission Organized.

THE COUNTRY has a right to expect that in the deliberations of the anthracite arbitration commission thoroughness shall not be sacrificed to speed.

In order that the commission may have ample time in which to consider the difficult matters to come before it, there should be an earnest disposition on the part of companies and mine workers to compose their own small differences as far as possible and not load them upon the commission.

the coal fields is great, and no better public service can be done by leaders of public opinion than to rouse upon those who exaggerate the inevitable frictions and misunderstandings arising from the return of the miners to work under unusual and not very clearly defined circumstances.

We have had a long exhibition of the spirit of fight, with both sides making a good showing in that direction. What we need now is an exhibition of how good fighters can get together, bury their grudges and act like men.

A clean, honest, able and trustworthy man for governor is the verdict on Judge Pennypacker, and it will not hereafter have to be set aside.

The Hague Tribunal.

THE FIRST case laid before the arbitration tribunal at Hague has resulted in a verdict in favor of the United States. The claim was not disputed by the defendant to the action and the only issue which practically occupied the judicial conservatism of the assessors was the sum total of the amount due and the time and reasonableness of the accruing interest upon it.

The efforts on the part of certain judicial authorities to prove that kissing is an industry will probably be fruitless in results as the continual talk regarding the unhealthy properties of ice cream.

If Hon. Tom Johnson expects to be candidate for president he should not begin to read Democrats out of the party at this early stage. He will probably need them.

Morris and Penman have earned a reputation by good service in the commissioners' office, and besides, they are Republicans. Keep the Democrats out.

The Republican party has its faults, but compared with the Democratic party it is as Hyperion to a satyr.

On the base ball bleachers King Oscar's decisions would undoubtedly be characterized as "rotten."

It takes a term or two to teach a new congressman how, William Connell has learned how.

American Versus British Workmen.

ON THIS subject, Mr. Edwin Matthews, N. Y. C. E., of England, has published a very interesting pamphlet. I quote the following:

"It is true, as the present writer believes, and as he will agree, that the most-esteemed people are those who conquer in the contests of the world, the greater capacity for concentrated work possessed by the men who concentrate into a working day as much more than an Englishman as the latter exceeds the German or the Frenchman.

"Abundance of improved labor enables the employer to run his tools quicker and get more out of a given area of shop room with the same number of men.

"A career which leads to a head position, a position in which the labor of others can be exploited; in short, the position of 'boss' is the one that best suits the American instinct. In the United States, as in England, the material influence discourages dirty hands, and thus is created the army of non-descript who crowd the ranks of second-rate clerks, etc.

"The reason why some American trades unions cannot, or do not, impose the same restraint on individual exertion as do the unions of Great Britain, is because of the varying extent to which they cannot be brought into line and disciplined as efficiently as workers of one race. High-paid labor obtains the best results for the employer and the employed, but as a condition precedent the workman must have liberty, which is too often denied him by the arbitrary rules in European cities.

"Class distinction, as such, between rich and poor, nearly all rich people being workers, does not exist. The few rich Americans who live without work have to settle in Europe to enjoy such distinction. The absence of this class distinction also leaves a clear field for the best of the working classes.

his civic disappointments and the ingratitude of a world that would not believe in full in the sincerity of his professed conversion, perhaps James Younger did as well as could be reasonably expected in taking, by the hand that laid low so many others, a life which was the most lawful perquisite out of which a hangman was ever cheated.

The fact that King Oscar of Sweden has sucked us in an arbitral decision is not to be wondered at. He is simply observing the European fashion and playing close to his nearest neighbor. We can expect that kind of treatment every time we consent to a crown-wearing referee.

Not a word is said reflecting upon Justice Voshurg's ability or fairness. As the pioneer judge of our orphan's court, he has had the heaviest work to do and has admittedly done it well. That should be enough to influence every right-thinking man to vote for his reelection.

A simplification of the machinery of coal delivery in the large cities, with limitation of the number of intermediaries claiming profits, would go a great way to relieve distress. It is for your step over life's path will be lighter.

When the load from your bosom is cast, and the glorious sky will seem brighter, when the cloud of displeasure has passed.

Though your spirit swell high with emotion, Sink the thought of oblivion's ocean. For remembrance increases the pain. Oh, why should we linger in sorrow, When his shadow is passing away?— One week to remember tomorrow, The blast that overtook us today?

Our life's stream is a varying river, And though it may obliquely glide, When the sunbeams of joy o'er it quiver, It must from where the storm meets its tide.

Then stir not its current to madness, For its wrath that will ever regret; Though the morning beams break on thy sadness, Ere the sunset forgive and forget. —Robert Gray, in Success.

FORGIVE AND FORGET. Forgive and forget—it is better To fling all ill feeling aside. Than allow the deep coloring fester Of revenge in your breast to abide; For your step o'er life's path will be lighter.

This is eminently for the good of the community. The wishes and convenience of workmen in America is studied to an extent unknown in Europe. Work before breakfast is avoided, the shops are already warmed when the men arrive, and ice-water is available at all times.

Differring from the English workmen, the American usually washes, and changes his coat, before leaving the shop, and sits down to his evening meal clean and respectable. This has effect on his children. The early advancement given in the United States to young men puts new ideas into the minds of our youth. Some times this brings shallowness to the front, but the energy of youth more than balances, largely by reason of this, the American superiority whatever may be its cause—will continue.

"No comparison of American with British workmen can be complete without reference to the system of processes in American factories, and to the consolidation of trade into specialties, which can be carried on cheaply, because of a large repetition scale. This leads to cheaper prices and quicker deliveries, and carries the day."

American workmen should ponder these facts before hastily interrupting or delaying the course of labor.

—Walter J. Ballard, Schenectady, Oct. 21.
