

GLOBE-WERNIKE SECTIONAL BOOKCASES.

We are pleased to announce to the people of Scranton and vicinity that we have secured the sole agency for this locality of the above line. These, beyond question, are the most modern and best existing sectional bookcases. They are the best—

- BECAUSE They have more patents on desirable and necessary features than all other makes combined.
- BECAUSE They have the roller bearing doors.
- BECAUSE They can be had in any desired height or depth.
- BECAUSE They are constructed of only the highest grade of seasoned lumber, and are thorough dust-proof.
- BECAUSE They can be had in genuine mahogany, walnut, quarter-sawn or plain oak.
- BECAUSE Their finish is of the highest standard.
- BECAUSE They are suitable for a library of 25 or 20,000.
- BECAUSE Last, but not least, their prices are lower than any other make on the market and containing their exceptional high standard of merit.

An Inspection is Solicited.

- Japanese Mattings: Choice patterns, cotton warp; a 32c value. Only. **25c**

THE MARKETS.

Wall Street Review.

New York, Oct. 31.—The improvement in the stock market yesterday was continued today and the list, while still comparatively dull and narrow, gave evidence of a more hopeful feeling. Advances were general at the opening, the gain in Manhattan being most noteworthy. Baltimore and Ohio was another strong issue, and Erie, Missouri Pacific, Canadian Pacific, Southern Pacific, Reading and St. Paul rose fractionally. St. Louis and St. James advanced a point. Little was done in the industrial issues at any time during the day. Steadiness was shown by a number of these stocks, however, among them the United States Steel shares. Louisville and Nashville was weak at the outset. On moderately large transactions the stock made a maximum decline of over 2 points but more than recovered this loss, making a net gain of 1. The Reading was another stock against which considerable pressure was shown, but all offerings were freely absorbed, and the stock made a gain equal to that of Louisville and Nashville. Manhattan was the feature of the day, both in respect of activity and strength. The trading amounted to 57,000 shares and a net gain of 2 3/4 points was registered. Some of the more substantial speculative interests were said to be back of the movement. In Manhattan, one of the arguments advanced in its support was that the company will show a great reduction in operating expenses as soon as its electrical equipment is completed. Much of the Manhattan buying came from interests that were prominent in the recent Missouri Pacific pool. A renewal of the demand for Colorado Fuel was accompanied by reports that inside differences had been settled. A further hardening of prices was shown in the late session and more traders who sold on yesterday's advance found it advisable to cover their contracts. The final hour developed no new features, though the tendency to further improvement was checked in a measure by the advance to 1 per cent in the rate for call money. The closing was firm, though dull. Total sales today, 45,230 shares. A firm underwriting was shown by the bond market, but the demand continued small. Total sales, net value, \$1,200,000. United States Steel declined 1/2 per cent, on the last call.
