

In his annual report, submitted to the achool board at its meeting in July, City Superintendent of Schools -Elmer E. Garr dealt with the enforcement of the compulsory education act, as follows

Never before in this school district was such an aggressive policy pursued leading to the enforcement of the compulsory education act. The fact that at the beginning of the last term there. was an increase of only twenty-seven over the corresponding month of the preceding term, while at the close of the previous term there was an increase some evidence of what was accomplished in this respect and also afford some encouragement of what can be

pursued. "No employer of child labor should keep in his employ children below the ployers and parents should be more do so.

the children. Children should be kent in school until they have at least a fair understanding of the English branches; in fact, there are very few cases where children should be allowed to discontinue at school before having completed the grammar grade work. I cornestly urge the strict enforcement of the law in its entirety the ensuing school term." Superintendent Garr is now carrying

out the threat or promise insplied in this portion of his report. Notwithstanding the numerous notifications to parents and the arrests made during this term, there is a noticeable disposition among certain parents to disregard the law and the friendly warnings from the superintendent. This tendency has grown so of late that patience has ceased to be a virtue with Mr. Carr, and he has inaugurated a movement against parents that he firmly proposes to carry on with vigor and perseverance until this lax spirit, tend
