There was a large number of people in the office, and someone had undoubtedly pocketed the money in the brief interval, while Mrs. Mullen's back was turned.

Those of our readers interested in the domestic problem will see one reason for their trouble in the fact that where-as in 1890 42.6 per cent. of women em-ployed in ganzful occupations were en-gaged in personal and domestic service, in 1900 the number had fallen to 39.4 per cent. mines had been invaded by these com-petitors for men's places at lower wages than the latter had been receiving. Whether this invasion has been a blessing or a curse to both the women and the men is a problem over which many are now pondering. Its imme-diate effects, so far as the men are con-cerned, have been the lowering of wages and the displacement of many from occupations to which they had been trained. That it has also had per-nicious effects upon the manners, if not upon the characters, of many of the women of the country is indisputable. There are some who profess to be in love with the new manners of the new Herbert Cokely was out gunning Frilay and had the misfortune to put a Archie Barnes is home from De Kolb.
