The gay bellesof fashion may sneer
In words and contempt—but what are they to me?
And sage admonishers recommend
Of drawing and painting—but what are they to me?
But give me the fair one, in country or city,
Whose home and whose heart are open to pity,
Who cheerfully marches to succor the needy,
While plying the needle with sympathy's art:
The bright little needle—the swift flying needle;
The needle directed by beauty and art.

If love have a potent, a magical token,
A talisman, ever resistless and true—
A charm that is never grasped or broken,
A witchery certain to subjugate—
'Tis this—and his triumphs never has furnished
To keen and unerring, or polished a dart,
Let beauty direct it, as pointed and burnished,
And oh! it is certain of touching the heart.
The bright little needle—the swift flying needle;
The needle directed by beauty and art.

Be wise, then, ye maidens, nor seek admiration
By dressing for conquest, and flirting with all;
You never, whatever be your fortune or station,
Appear half so lovely at route or at ball,
As gaily chirpened at a work-covered table,
Each cheerfully active and playing her part,
Beguiling the task with a song or a fable,
And plying the needle with sprightly art.
The bright little needle—the swift flying needle;
The needle directed by beauty and art.

TO MAKE ARTIFICIAL MARBLE AND STONE.—The following is the condensed specification of a patent granted to Selim R. St. Clair Massiah, and published in the May number of "Newton's London Journal and Repertory of Inventions." The material of which the artifical stone is made is plaster of Paris. After it has been prepared, and of the right shape, it is dried in a room at about 60 degrees. When completely dry, it is immersed in a warm solution of borax and glauber salts, prepared by dissolving one pound of borax and a quarter of an ounce of the salts in one gallon of water, as a ratio. After the casting is thoroughly wet in this, it is removed to the drying room, and exposed to a heat of 250 deg. Fahr., until all the watery parts are thrown off. It is then permitted to get nearly cold, when it is immersed in a strong hot solution of borax, to which has been added one ounce of strong nitric acid for every gallon of the borax solution. This solution is kept quite warm, and the castings kept in it until they are completely saturated, when they are taken out and dried, and found to have acquired a marble-like hardness. A day or two after this operation, the castings are slightly heated, and covered over with a thin coat of Canada balsam dissolved in turpentine, after which they are kept warm until the turpentine is driven off. Various colored substances may be used along with the materials specified to color the artificial marble, such as indigo for blue, and other substances for other colors. The marble may also be streaked and beautifully variegated.—*Scientific American.*

HOW ARTIFICIAL TEETH ARE MADE.—Pure crystalized quartz is calcined by a moderate heat. When taken from the fire it is immediately thrown into cold water, which breaks the rocks into numberless pieces. The larger pieces are then broken up into smaller ones, and the whole, when reduced to a proper size, put into a mill, which is itself made of quartz. The mill is turned by steam power. Here the pieces of calcined quartz are ground into powder, very much after the fashion of grinding Indian corn into meal. Next a variety of spar, which is free from all impurities, is ground up in like manner into a fine powder. Artificial teeth are composed of two parts, called the body and the enamel. The body of the tooth is made first; the enamel is added last. The next step is to mix together nearly equal parts, by weight, of the powdered spar and quartz. This mixture is again ground to greater fineness. Certain metalic oxides are now added to it for the purpose of producing an appropriate color, and water and clay to make it plastic and give it consistence. This mixture resembles soft paste. The paste, when thus prepared, is transferred to the hands of females, of whom we saw no less than fifteen engaged in filling molds with it, or otherwise working upon it. After the paste had been molded into a proper shape, two small platina rivets are inserted near the base of each tooth for the purpose of fastening it (by the dentist) to a plate in the mouth. They are now transferred to a furnace, where they are "cured," as it is technically called; that is, half baked or hardened. The teeth are now ready to receive the enamel, which is done by the women; it consists of spar and quartz which has been ground, pulverized and reduced to the shape of a soft paste or semi-liquid. In this state it is easily spread over the half baked body of the tooth, by means of a delicate brush. When this is accomplished, but one step more is required. The teeth must be subjected to an intense heat, for the purpose of thoroughly baking them. They are put into ovens, lined with platina, and heated by a furnace in which the necessary heat is obtained. The baking process is superintended by a workman, who occasionally removes a tooth to ascertain whether those within have been sufficiently baked. This is indicated by the appearance of the tooth. When they are done, the teeth are removed, and placed in jars or boxes, ready for use. An experiment which we made, tested to our satisfaction the hardness of these artificial teeth. We saw one of them taken indiscriminately from a jar full, and driven without breaking into a pine board until it was even with the surface of the wood.—*Boston Christian Register.*

MACKEREL—100 bbls. No. 3 Small, to arrive and for sale by JOHN WATT & CO.

ALUM—50 bbls. for sale by J. SCHOONMAKER & CO.

LOVERING'S SUGAR.—20 bbls LOVERING'S refined and pulverized sugar just received and for sale low by WM. A. McCLURG & CO. 256 Liberty st.

SARDINES IN BRINE.—111 kegs Sardines in brine (Sardelles), just received and for sale low by WM. A. McCLURG & CO. 256 Liberty st.

BILL PAPER—A superior lot just rec'd and for sale by W. SHAVEN, Stationer, corner of Second and Market sts.

TOWNSEND'S SARSAPARILLA.—74 dozen just received and for sale by R. E. SELLERS.

PINK ROOT—400 lbs. prime quality, just rec'd and for sale by R. E. SELLERS.

CITRIC ACID—250 lbs. just rec'd and for sale by R. E. SELLERS.

AMERICAN STATE PAPERS.—State Papers and Public Documents of the United States, from the accession of George Washington to the Presidency, the whole forming a complete view of our foreign relations since that time, including Commercial Documents.

Notes of debates in Congress; containing Political, Historical, Geographical, Scientific, Statistical, Economical, and Biographical Documents, Essays and Facts; together with Messages of the Presidents, and a Record of the Events of the Times from 1817 to 1828.

The above valuable work for sale by R. E. STOCKTON, 47 Market st.

INDIA RUBBER BELTING—Just rec'd, from the manufacturers, 1500 feet Light Belting, for Wool, Silk purposes, suitable to the India Rubber Jersey. Now for sale by J. & R. PHILLIPS.

LEATHER—100 Sides N. Y. Sole, for sale by J. & R. FLOYD.

EYE AND EAR FOUNTAIN.—The attention of the medical fraternity is invited to the Eye and Ear Fountain, by Dr. Peck, Physician, of New York.—Just received and for sale by W. W. WILSON.

BOTTLE CORKS—300 gro. for sale by R. E. SELLERS, 57 Wood st.

PARIS GREEN—540 lbs. sup., for sale by R. E. SELLERS.

HEMP—45 tons Manilla, for sale by JAMES A. HUTCHISON & CO.

PLASTER—500 bbs. Cantharides, for sale by R. E. FAHNESTOCK & CO.

Pure Brandy, for Diarrhœa, &c.

BEAR IN MIND! should you need French Brandy, the very best can be obtained at MORRIS' Tea Store, in the Diamond, at $1 per quart or bottle.

FIRE BOARD PRINTS—For sale at 25c., by WM. MARSHALL, 45 Wood st.

TAR AND ROSIN—
100 bbls. N. C. Tar, in good order;
100 " " Rosin, No. 2;
For sale by JOHN WATT & CO.

JUNIATA NAIL RODS—95 bundles Slit, for sale by J. & R. FLOYD.

JUNIATA NAIL RODS—95 bundles Slit, for sale by J. & R. FLOYD.

"New Music."

THE SPIRIT POLKA, composed by H. Kleber, and dedicated to Stephen C. Foster, of this city.

Dyrsly's Waltz, arranged by H. Kleber, as played by Brady's Band—one of the most popular waltzes ever.

Holly Bell, with variations, by Dalby.

Dolly Lorne, with variations, by Dalby.

The Autumn Leaf Waltz, by George Barker.

Tales, a collection of foreign Music for piano, Flute, Violin, &c.

Just published, 100 Irish Melodies, arranged for the Piano Forte, by George Barker.

Sign of Orchestral Harp.

P. S.—A splendid lot of new PIANOS now opening. One very good second-hand 6 octave Piano for sale.

MEDICAL.

The Human Body Must Perspire,

SO SAYS NATURE, to have a healthy action; and persons who do not perspire, are liable to the most disgusting Skin Diseases. Now, Jones' Italian Chemical Soap flatters a free perspiration, and at the same time modifies and softens the skin, giving it the appearance of an infant's.

Scurvy, Salt Rheum, and Sores, are not only healed, but entirely prevented, by the use of this Soap. Those who have a sallow complexion, Pimples, Blotches, Freckles, or any other skin disease, will be cured (in the end) by the use of this Soap. Those who are troubled with Dandruff, or Scurf on the head, will find this all, and even more (admirable) in its properties) than I state.

But, reader, the stores are flooded with imitations, and be sure you ask for JONES' Italian Chemical Soap—and buy it only of WM. JACKSON, only Agent in Pittsburgh, head of Wood.

Pearly White Teeth, and Pure Breath, to be had for 25 cents.—Those who have been thoroughly assured that if their breath is ever so foul, or their teeth decayed, dark or loosened, and encrusted with tartar, that a 25 cent box of JONES' Italian Tooth Paste will make the teeth as white as snow, and the breath odoriferously sweet,

Sold only at JACKSON'S Store, 256 Liberty st., head of Wood.

A Scientific Hair Tonic, Restorer and Beautifier.—Field's Bohemian, 37½ cents. Those who have used JONES' Coral Hair Restorer, know its excellent qualities—those who have not, we assure it to possess the following qualities:—It will force the hair to grow on any part where it has become thin; it will cause grey hair to grow; stop it falling off, cure scurf or dandruff, and make light, red, or grey hair cover dark. For rendering the hair soft and silky, nothing can exceed this; and makes it truly beautiful and keeps it so. It is, indeed, the most economical—yet superior—article for the hair.

So only at WM. JACKSON'S Store, 256 Liberty street, head of Wood, Pittsburgh.

Price—37½ cents, 50 cents, and $1.

JONES' Solution of Jet, a Liquid Human Hair Dye, for the changing of white, red, or grey hair, to beautiful brown, or black jet color, in a few minutes.

Price—50 cents, and $1 per bottle.

Sold by WM. JACKSON, 256 Liberty street, head of Wood, Pittsburgh.

JONES' LILLY WHITE.—Ladies are cautioned against taking the common preparations, as they are not aware how frightfully injurious it is to the skin. Our course, how ever, is clear, we have got up a pure article, and one that will improve the skin's appearance, after using one pot only; and unhealthy complexions, nothing a more speedy cure. Price 50 cents, and $1 per bottle.

We have prepared a beautiful vegetable article, which we call Jones' Spanish Lilly White.

It is perfectly innocent, being purified of all deleterious qualities; and it imparts to the skin a natural, healthy, absorbent, fitting white, at the same time acting as a cosmetic on the skin, making it soft and smooth.

Sold by the Agent, WM. JACKSON, 256 Liberty street, head of Wood, Pittsburgh. Price, 75 cents.

An interesting

The most Extraordinary Discovery in the World is the great Arabian Remedy for Man and Beast!

H. G. Farrell's

CELEBRATED ARABIAN LINIMENT.

THE miraculous cures performed by the Arabian physicians in the days of old, are looked upon as the result of magic, but since we have become intimate with their history we can thus account for their surprising power over disease. Their ardent desire for knowledge of medicine were the wonder of the age, while at the same time the science of Chemistry was unknown, with them had its origin, was to the rest of the world "a sealed book." and in fictory they were the most zealous of students. In the beautiful groves which skirt the deserts of Arabia, abound rare plants and odorous trees, from which is obtained those aromatic gums and fragrant balsams, of which this incomparable Liniment is composed, and by whose stimulating motions, penetrating and healing properties it is, when applied, instantaneously diffused through the whole nervous system, allaying the most intense pain in the incredibly short time of 10 or 15 minutes. Its action is prompt, powerful and effectual, without the least danger. It penetrates the flesh to the bone, relaxes the contracted cords, restores the circulation which has been retarded for years, causing the shriveled flesh to grow out and rich blood to circulate through the veins. It restores the synovial Field or Joint Water, and this is the reason it has been so universally successful in curing all diseases of the Joints, in chronic affections of the Spine, Liver, Lungs and Kidneys, this great Arabian remedy stands unrivalled, for Ague Cake or Enlargement of the Spleen, it is a specific and for Rheumatism it has performed some of the most extraordinary cures on record. For Cramps, Swellings, Pains, Wounds, Chilblains, Burns, White Swellings, Tumors, &c. &c., it is equally successful in diseases of Animals, such as Farcies, Poll Evil, Fistula, Old Conghs, Blindness, Injury, Sore Sprains, Bruises, Wounds, Mange, Sparins, Windgalls, Ringbone, and all diseases, either in man or beast, which require an external application. This liniment stands at the head of all medicines.

The following is from the principal accountant of the wealthy and highly respectable house of YERIS & BRO., of Paris, and presents one of the most surprising cures in the annals of medical history:

Mr. H. G. Farrell: Dear Sir, Actuated by a sense of gratitude, I submit the following as a statement of the miraculous cure of your great medicine. My child, three years old, was suddenly attacked with a terrible disease, which baffled the skill of physicians, prostrated it to *total helplessness*. The limbs became so rigid that the joints could no longer bend, the face turned black and cold, and *entirely deprived of feeling*; the eyes fixed, partially closed and glassy, and the breathing was so long that we *despaired* to all sounds; the pulse became confined, and so cured, that what in laying on the bed, the head and feet *could only touched*. Indeed, the child presented every appearance of being already immortality on the subject, the family physician was called in, and for a fortnight labored to restore it to feeling, but all in vain, although it was blistered a dozen times, and every other remedy and means applied. A consultation of physicians was then held, but to no purpose. The case was then brought before the Medical Society, but nothing could be suggested which had not already been done, and the unanimous decision was, he could do nothing more. We then commenced applying your Liniment freely over the entire length of the spine, and you may imagine a parent's *joy*, when after a few applications, *returning sensation was apparent*. The child rapidly recovered, will be eight years old the 25th of which did not become perfect for nearly a month. It is now healthy and robust as can be.

Five other cases of the same kind occured in my neighborhood previously, all of which died; when, no doubt, your Liniment had been used, they would have recovered.

Sworn, March 1 1851. HENRY G. CLELAND.

Liver Complaint, Erysipelas, and Rheumatism Cured.

RAYNER, Marion Co., Ky., May 27, 1850.

Mr. H. G. FARRELL—Dear Sir: Your Liniment is selling very well, and doing a vast deal of good among the people around here. It has cured me of Erysipelas, and a good deal of side pain in the breast. A lady, who was confined to her bed for several months with Liver Complaint and Disease of the Heart, was entirely cured by the use of your Arabian Liniment. She said she knew she could get well, and stood. It has been applied on a fresh cut, and cured it in a short time. I have been afflicted with Rheumatism for a long time, and just before a wet spell it pains me so much that I had no peace all day; and in the night I commenced bathing and rubbing with your Liniment, and before I was done rubbing, the pain ceased.

Yours, &c. JOHN BUCKMAN.

Stiff Complaint, Sweeny, Distemper, Corks and Sore Eyes Cured.

[H. Mitchell, Postmaster at Flat, Fulton County, Ill., says:]

Mr. H. G. FARRELL: Your Arabian Liniment is highly prized here. We cured one of my neighbors' horses of the Stiff Complaint by about four or five applications, and cured one of my own of the Sweeny. Our Sheriff, Joseph Price, cured his horse of a bad case of Distemper. In fact, it is a cure all that had the Distemper very bad, and cured it almost immediately. It is decidedly the greatest horse medicine he ever used. They have been using it in the adjoining counties, obtaining a large quantity of land
