Smith's Patent Self-Acting Hinge & Spring.

A NEW INVENTION.

THE attention of Carpenters and Builders is called to the above article, which is pronounced by the scientific men of New York and other eastern cities, as being the most valuable invention of the age, and where it has been successfully introduced, and is now used in the most extensive buildings, that is ever done. It consists of a hinge that will work noiselessly either way, with a spring in the top of the door to keep it in its place, thus avoiding the old fashioned spring to keep the door closed, and likewise pulling away with its disagreeable noise of slamming. It cannot very cheap, is not liable to get out of repair, is very easily applied, and is peculiarly adapted to store, bilding, office, or church, and other doors.

A large supply just received from New York; also, a sample door, with the improvement adjusted, which can be seen on application to JOHN A BROOMER,

Allegheny Planing Mills.

Also, agent for the sale of Sights for the Woolworth Patent Planing Machine, for the Western and Southern states. nov21 3m
