HENRY WATERMAN'S PATENT HAMMER SAWS.

The subscriber would call the attention of dealers, and others, to this superior article. By his patent process of hammering, the saw is more thoroughly tempered than it can be by any other method. It is well known to machinists that the surface of hammered steel is the hardest part. Where saws are hammered according to the usual method and hammered by hand, it is necessary to polish them, thereby grinding off the most serviceable part of the saw. These saws are tempered, and only require a touch of the stone. They are the lightest, best and most durable saw Mills in this country, and pronounced unequalled. We are now prepared to execute orders for all sizes of Mills, Fit and Circular saws.

INDIA RUBBER GOODS.

THE UNDERSIGND WOULD ANnounce to Merchants, throughout the United States, and Canada, that his Spring stock of Rubber Goods is now complete, and he feels fully superior, in many respects, even to any heretofore offered by him.

The mixed and ruggheavy is the result of long study and experiment, and he invariably found it to produce the most salutary effect, not infrequently in cases where all the ordinary preparations recommended for worms, had been previously resorted to without any permanent advantage. This fact is attested by the certificates and statements of hundreds of respectable persons in different parts of the country, and should induce families at a distance to write for a trial of the preparation in their possession. It is mild in its operation, and may be administered with perfect safety to the most delicate infant.
