with some appropriate comments:

"We are happy to announce that we have heard a roice from Clarico, which brings the cheering news, in clear tones, that the country is rafe and that that sterling county will give a larger majority for the Democratic ticket than has ever been given before. The furances of the Democracy are in full blast, and there is now not a doubt but that unwavering Democratic County will turn out a larger majority than it ever has before. We are informed that the nature of Scott and Graham are cancely ever heard except to connect them with Websier's joke about the and feathers."

They have "keard a voice from Clarico." They have "heard a voice from Clarion,".

When the latter were in full blast, labor had abundance of employment, and the farmers had good markets for everything they could spare. But how is it now? Do the "furnaces of Democracy," which are now said to be in full blast, afford a good paying market for produce and labor? Do they enrich the country, bring comfort and contentment into the dwellings of the poor, or prosperity to the agricultu-ral classes? The very opposite is the fact— Their full blast has blasted the prosperity of that fac county, but out the fires of its furnaces, and deprived its hitherte prosperous people of the means of prosperity. But whilst the blast from "the furnaces of the Democracy" has blown out the fires of American iron furnaces, it has imparted unwonted activity to the fires of those of Great Britain. Is th ionbled? From the London Times.

"The triumph of the candidate of the Democratic arty, BROUGHT FORWARD BY THE MEE OF THE party, BROUBET YOUWARD BY THE MEE OF THE SOUTH, will scare, probably for eor, the sacend-ency of liberal commercial principles, and if Lord Derby should next year be disposed to take the American tariff for his model, we have little American term for ms mouth, we have the doubt that it will serve to remove the last lift stone of the protective system from his min-lu this respect, and on this point, we take Get Pierce to be a fair representative of the opicion of Mr. Calboun, and, as much, a valuable practic ally to the commercial policy of this country."

The Times is a good "Democratic furnace," oo, is it not?. It can blow a strong blast at all events for the candidate of "the men-of the South " and the "trainable practical ally to the commercial policy of "Great Britain.

Here is another extract from another leading" English paper, which, although not so confident, because not so well informed as the Times, is full of hope that Gen. Pierce will "co-operate with England" in its efforts to break down American manufacturers, and give to that country a full and enduring ascendency.

The next extract we shall give is more condidance of many American friends that it will pleased with Gen. Pierce; and why? The Illinois Statesman tells the following good attory:

"It was our good fortune a few evenings since to make the sequaintance of an old Irish gentleman of considerable information, who had been traygling for nearly two months past in the St.des of Ohio, Indiana, Michigan, and the north ern part of this State. He informed us that in his travels he had een quite a number of his countrymen who would vote for the Hero of Lundy's Lane for President in November next, and for our gratification he related a conversation which took place in the town of B—______ in the larth of this State. He was, he said, stopping for the night, and was placed in a room with several others, two of whom were from the country of Limerick, freland. They had that evening attended a democratic meeting. Soon after we were in our spartment, the cldest of my country tron asked me if I was not a democrat. I answered no, that I had been a whig for many years, though when I first came to America I was not been a subject to the second of the country, the wants and increase of it, such as the protective Tariff, &c.d.d., I was a whig. My friend soon laformed me Unat he and his comrande were both dimeerats. For, said he, when we landed at New York, we were waited upon by a couple of gentlemen, who informed us that the whigs were against us, and did all in their power to keep us 'away from Junerica, and they would sooner see us starre then give us a day's work. But we have not fund it so, and as for General Soott, he is just the man for us, and if we live we intend to vote the him for President in November next; for, said he, it would be a crying shame to vote against a man, whose whole life has been devoted to his country's service, and by jist knowing him thereughly we understand the whole history of this lissed country. And if it was not for the Layders of our dimocratic party, and such men as these who met us on the ship at New York, we would eat our fine and the stripe. We are not afraid to his cantry's service, and by jist knowing him therefore

Hear what this sensible and patriotic Irishrd a sad commentary upon 13300 says of the means taken to poison the minds told by a couple of gentiemen, Tammany Hall Locofocos, that the Whige were against Irieb-men—were doing all they could to keep them way-would not give them any work to keep them from starving, etc.; the whole of which the are wholly false, as every frishman knows, she has been in this country a few years. Con trast this lying Locofocce statement with the fact, t the late Democratic Convention, the party nominated a man for the highest office in the fac of the people of this State, at the approachag election, who, when a member of the Cor reation to reform the Constitution of the State, ofered a resolution to amend the constitution se a to deprive all foreigners who should arrive af ter 1841, of the right of suffrage, not for 21 years, but for life, and also to deprive them of the right to hold office, and all the benefits of

citizenship. This man is Judge woodward, who er, and who is now the Democratic candidate or that honorable office. Should any person haritably hope that he has repented of this bit ter opposition to our foreign population, we have ed his opinions and acts in this matter no loned his opinions and acts in this matter no longer ago than last year, and that it was with a full knowledge of his opposition to naturalizing foreigners, that the Democratic party nominated him for this high office. Here is a striking fact, which shows how much regard to our for cign population the Democrats really possess They will flatter them and promise them grea

things, waiting all the time for an opportunity to deprive them of political privileges altogether.

The Iowa Stants Zeitung, a German Democratto paper, published at Dubuque, has hauled down the fing of Pierce and King, and run up that of Scott and Graham. This is a signifithat of Scott and Graham. This is a signif-cant sign. The President, the Secretaries of State, Interior,
and Navy, have taken flight with Congress. The President seeks repose from the cares of State amidst the rural shades of Berkeley, in the Old the saline breezes of Marshfeld. People here seem to wander about the streets of their overrown village like the melancholy shadows which will flit through the purlicus of a watering place, even after the scenes of its glory have departed with the scanon which gave them birth. At no other session of Congress has so much been done for the improvement of the Capital City. More than a million of dollars was appropriated for

the continuence of work upon the two principal unfinished public buildings, the grading and pav-ing of streets, the repairs of bridges, the plant-

It causes a rad reflection upon the uncertainty of the tenure by which we hold all things in this life, that the man whose taste and genius were of absorbed, a few weeks since, in the task of making the public grounds of Washington the finest on the continent, has been snatched wway by a senden and fearful calamity, leaving the works which he planned to be carried out by others.—
But his design will be executed with a more or least deligy by his successor, and by the aid of the swakened differability of Congress, the seat of the world. Among other pravisions for which our citizens have cause to congratulate themselves, is an appropriation for a survey preliminary to the adoption of means for rapplying the otity with water.
