HOME MATTERS.

LET NOT THE PEOPLE BE DECEIVED.—We learn that rumors will be put in circulation to-day, and will probably be sent into the country, stating that the Whigs and Democrats intend uniting on Kent or Riddle. This report is of course false—let not the *people be deceived.*

FINE LEATHER.—We were much pleased by the collection of fine leather of different varieties and qualities, exhibited by B. & C. Hays, of Liberty street, at the late County Fair. It was beautifully finished and reflected credit on the manufacturers. Indeed, so far as we are competent to judge, we have never seen a better article in any State in the Union. Their sole leather, for which these gentlemen took a first class diploma at the Allegheny County Fair, in point of tanning and dressing, cannot be excelled. They also obtained a first class diploma for harness leather, well known to all our saddlers and harness makers to be of the very best quality.

A large assortment of calfskins, skirting, sole, harness leather, &c., of their own manufacture, will always be found at the establishment of these gentlemen, and we advise our readers to give them a call. In the present crowded state of our columns, we are compelled to omit an extended notice of their tannery, &c., but will resume the subject at an early day.

NEW PLOUGH.—A newly invented plough, exhibited at the County Fair last week, attracted a great deal of the attention of our agricultural friends. It was patented by Mr. Philip B. Kinfriends. It was patented by Mr. Philip B. Kinkead, an old and well known plough maker of this city, and is manufactured and sold by Shankland, Stevenson & Co. of Liberty street. It is termed "the iron union plough," and appears to be an admirable article. Its beam is pears to be an admirable article. Its beam is of a peculiar and excellent construction, and the handles so arranged under it as to give the ploughman the greatest command over his furrow.

The mould board is somewhat longer, and of a shape different from that of most ploughs, but appears say that it is a decided improvement. The setting clevis is also patented, and appears to us to be an excellent invention, since by means of screws, the plough is made to take a deep or more shallow hold on the ground, and to make a broad or narrow furrow. Altogether we are much pleased with it, and anticipate that it will be found to work well at the annual ploughing match, which will take place in a short time. We reserve a further notice of it until then, and have no doubt that its merits will force us to give it a more extended notice at that time.

CUTTING BOX.—The best straw and hay Cutting BOX we have ever seen, is that patented by L. Tucker, who can be seen at Shankland & Stevenson's, Liberty street. Let all our farmers call and examine it.

NOTES REFUSED.—We give below, for the information of our readers, a list of bank notes, which are refused by our brokers:

WHIG MEETING AT DEER CREEK.—A meeting of the Whigs of Indiana and some of the adjoining townships, was held, agreeable to appointment, at Roger Sell's on Friday evening, the 8th inst. Mr. Josiah Lee was called to the Chair, and J. Miller appointed Secretary.

After the organization of the meeting, addresses were delivered by Messrs. Denny, Darsie and Fetterman.

The meeting was large and enthusiastic, and the addresses able, eloquent and convincing.

That fraud and corruption prevails upon our public works, to an alarming and fearful extent, was fully demonstrated, and that a change in the Board would do much to correct these evils was clearly shown. A vote of thanks was tendered to the speakers, and the meeting adjourned—well pleased and fully determined to do their duty on Tuesday next.

COMMITTEE OF VIGILANCE OF THE FIFTH WARD.

John A. Foregus,	George Hamilton,
J. H. Leasnell,	Thomas Hays,
Edward Kaye,	Terance Clark,
Hugh M'Kelvey,	Richard Thompson,
J. Cust Blair,	Andrew M'Bride,
Chauncy Bostwick,	John H. Ralston.

CORRECTION.—A diploma was awarded to Sherlock & Brackbill's portable patent cutting machine, made by Wm. McHenry, at the late Allegheny County Fair, by us erroneously termed a corn and cob grinder in the report.

CORRECTION.—In our report of the premiums on patent axles, the name of the inventor of one of the varieties should have been printed Harman, instead of Jarman Skiles.

WHITE TURKEYS.—The beautiful white turkeys exhibited at the Fair, belonged to W. C. Denny, of Indiana township, instead of Mr. Chase, of Ross, as before announced by us. They were were beautiful birds, and received a diploma.

NATURALIZATION.—The Courts yesterday were occupied in the naturalization of foreigners, to the exclusion of nearly all other business.

BURGLARY.—Police officer Hague yesterday arrested a colored man named John Penney, on a charge of having broken into the house of George Lanner of Versailles township, and stolen a number of articles, together with some money therefrom.

On examination, he confessed that he was the guilty party, and also that he had been concerned in the various other thefts committed in the same neighborhood of late. The prisoner is a great scoundrel, and only discharged from the penitentiary a few weeks ago. He was of course fully committed by Mayor Guthrie.

THREATENING LANGUAGE.—Alderman Major yesterday held Wm. Young to bail, charged, on the oath of John Shey with threatening to do him bodily injury.

SUICIDE.—A man named Henry, one of the carriers of the Chronicle committed suicide on Sunday by taking laudanum. He was janitor of the First Ward school house, and went into it on Sabbath morning at nine o'clock. At five o'clock in the afternoon, he was found lying in one of the rooms apparently in a sound sleep.

As his family were unable to waken him, they became alarmed, and sent for Doctor Morgan, who found that he had taken laudanum and that the case was a hopeless one.

At seven in the evening he expired, and a Coroner's jury held over his remains, returned a verdict in accordance with the facts. The unfortunate man had been but a few months in this city, where he removed from Wheeling, and leaves a wife and four children in destitute circumstances.

LOADING.—Mayor Guthrie yesterday committed Robert Godfrey and Thomas Bullock, for being common loafers about the market house.

CARRYING WEAPONS.—James Clark was arrested on Sunday night by watchman Ferguson, charged with creating a disturbance in the streets. He had a large knife in his hand, with which he threatened to stab the officer, but was safely secured, and taken to the watch house.—He was discharged in the morning on payment of a fine.

PORTRAIT OF HENRY CLAY.—The beautifully embroidered portrait of Henry Clay, which obtained a first class diploma at the County Fair, was worked by Miss Sarah Jones. It was incorrectly printed "Margaret" in our paper of yesterday.

WHIG MEETING AT TURTLE CREEK.—A beautiful Pole measuring 110 feet, was raised by the Turtle Creek Scott Club on Saturday the 9th inst., at which time great enthusiasm was manifested. The immense concourse was called to order by the President of the Club, who announced the following named gentlemen as officers of the meeting:

John Peterson of Port Perry, President; Vice Presidents, Duncan Hamilton Esq., Dr. Lyon, Wm. Shaw Esq., Samuel Carlisle Dan'l Ennis, John Shaffer, Mr. Milligan and Peter Perchment. Secretaries, Joseph M'Master Esq., and James B. Leader.

The Third Ward Glee Club being present sang one of their soul-stirring songs, after which the meeting was addressed by Robert M'Knight in his usual eloquent style. He was followed by C. O. Loomis, when the meeting adjourned with three cheers for Scott, Graham, and the entire Whig ticket.

There is a great run on the bogus banks in Washington. The Bank of the Union had a large circulation in the district. There are various unknown banks without banking houses circulating notes dated at Washington. The run is being made on the Central, Citizens', Empire, Fulton, Mechanics' Merchants', Exchange, Alexchants' and Mechanics' Metropolitan, Ocean and Railroad Banks, and about a dozen others having offices here.

There is a disposition here on the part of the public to set their faces against irresponsible issues of Bank notes.

HUNT'S MAGAZINE.—We have received the October number of Hunt's Merchants' Magazine and Commercial Review. By a cursory view of the contents of this number we find it well filled with choice original and selected matter—such as cannot fail to be of vital interest to every class of readers, whether the Banker the Merchant, the Manufacturer or the Agriculturist, to all of whom we would most cordially recommend this excellent work.

In the number before us we find a notice of Mr. Ormsby's new work on "the method of constructing Bank Notes to prevent Forgery," from which we extract the following:—(see p. 520—571.)

The source of this great evil, Mr. Ormsby, in this volume, shows to be the facility with which counterfeits may be made by a process of removing which no mind can, realize, that is now travelling the rounds in the place of the present system of bank note engraving is perfected.

By the process consists of a transfer of the pictures, vignettes, scroll work, denominational figures, &c., all detached, and each is appropriately from their respective engraved plates, from which upon the plate by machinery, for the sake of economy. Though the process is simple, and the result perfect, as much as each note, it appears that none reasonably secure from counterfeiters, but will in the power of the counterfeiter to imitate very work however good. He will procure machinery and dies as well as the bank note engraver, for they are in the market, and can be purchased by any one who has the money. Instead of the counterfeiter, moreover finds it correctly easy to procure the separate parts from different engravers, without any knowledge on their part of his design. Here is then the real source of danger, and the only security against it is engraving and the use of machinery and dies.

Mr. Ormsby proposes to strike at the root of the evil, by requiring of every bill one complete and indivisible design for the whole surface of the bill, with the engraving interwoven by the hand of the artist so as to form an integral part of the design. This will compel the forger to do the whole work himself, which he cannot do without the aid of a partner. He cannot engage his claims or demands against the estate of the undersigned will please present them for settlement, and those indebted will please make payment to
