I learn that the meeting spoken of in the first extract was the largest and most enthusiastic ever held in Buffalo on the subject of internal extract was the largest and most enthusiastic year beld in Buffalo on the subject of internal improvements, and that the views expressed by the editor were endorsed to the fullest extent.

Thus we see what estimate is put upon this road by the people of western New York, and how important it is that it should be pushed on with all the vigor, possible. There will be no lack of founds; and it is new certain that the stock will be, among the very best in the United States, as the road itself will be one of the most important to conheading. However, the meshes the control of the property important connecting links between the north-ga-tern and south-western sections of our coun-try. These letters and extracts also show us the value of the vast mines of coal of the Alle-gheav valley: This coal field extends from Pittsburgh to M'Kean county. Some of the mines in Clarion, Jefferson, Elk, Porest and M'Kean countles are ten and twelve feet in thickness, and are believed to be absolutely inexhaustible. Western New York and Canada are destitute of ccal; and the immense and rapidly increasing population of those extensive regions will require a very large and ever in-

reasing supply.

But in addition to the coal, this valley is rich in iron, lime, fire clay, glass sand, and the finest of lumber. Much of it is excellent agricultural and grazing land, and its beautiful atreams will give any quantity of water-power. This road

stock will command a premium both in Pitter burgh and New York.
