PITTSBURGH GAZETTE.

PUBLISHED BY WHITE & CO.

PITTSBURGH.

MONDAY MORNING, MARCH 14, 1853.

READING MATTER WILL BE FOUND ON EACH PAGE OF THIS PAPER.

PITTSBURGH WEEKLY GAZETTE.—The extensive circulation of our Weekly Gazette offers to our business men a most desirable medium of making their business known. Our circulation is between four and five thousand, reaching almost every village and county in Western Pennsylvania and Eastern Ohio.

TO ADVERTISERS—Neither the Editorial Rooms nor Printing Establishment of the DAILY GAZETTE, are opened on Sunday. ADVERTISERS who desire their notices to appear in the paper on Monday morning, will please hand them in before 5 o'clock, on Saturday evening.

WHIG STATE CONVENTION.—The Committee of Correspondence, composed of the delegates to the late Anti-Masonic Whig County Convention, are requested to meet at the Court House, on Saturday, the 19th inst., at 11 o'clock, A. M., to appoint 7 delegates to the State Convention at Lancaster, on the 24th of the present month, to nominate Canal Commissioners, Auditor General and Surveyor General. JOSIAH KING, Chairman.
March 7, 1853.

Editorial Correspondence of the Pittsburgh Gazette.
BARNUM'S HOTEL, BALTIMORE, March 10, 1853.

We left the pleasant city of Annapolis this morning, after a most pleasant visit. We were treated there with a courtesy and consideration which I shall ever remember with pleasure.—We had our bill prepared, and in the hands of the Committee, and it will be read in the House to-day. The morning was truly delightful.—The air was balmy, the sun shone brightly, lighting up hill and dale, and glancing from the bright waters of the bay, while all nature appeared to be putting on her holiday attire.—Very pleasant are my memories of this old but most delightful city, Annapolis.

In the cars we met Governor Lowe, the present official resident of the Government House.—He is quite a young man, frank and affable, and expressed his cordial approbation of our road.

On arriving at Baltimore, we parted with our friends of the Cumberland Committee, Messrs. George A. Pearre, J. H. Gordon, Normand Bruce, J. P. Roman, and C. B. Thurston, Esqs. A Committee composed of more gentlemanly and energetic men never was formed. Our associations with them have been exceedingly agreeable, and we exchanged adieus as with old friends, promising to greet each other on the tops of the Alleghenies, when our road is completed, if our lives should be spared for a few years longer.

Dr. Gazzam proceeded at once to Philadelphia, where he will remain some days. He rendered very efficient assistance in our negotiations, and thought no labor too arduous to promote the object we had in view.

Gen. Larimer and myself spent the day in making calls here. Our first visit was to Mr. Swann, the President of the Baltimore and Ohio Railroad Company. He informed us that our communication had been committed to a Committee of nine members, and that as soon as their report was made, it would be communicated in writing. He expressed, however, his decided opinion that an arrangement entirely satisfactory would soon be made.

We next waited upon Mr. Bose, the Chairman of the Committee on Internal Improvements, of the Board of Trade. He informed us that the report on the Connellsville Railroad, which was published in the Baltimore American on Wednesday, had been printed in pamphlet form, and would be sent to the Councils and the members of the Legislature. He will watch over our interests here, and see that the matter is fairly brought before the Councils.

Mr. Dobbin, of the American, politely invited us to ride around the city, during which we visited Green Mount Cemetery, a very beautiful and richly adorned burial place.

We also saw several other gentlemen, and finished up our business in Baltimore. We shall leave to-night, or in the morning, for home, by way of Philadelphia and Harrisburgh. D. N. W.

THE WHEELING BRIDGE.

The Supreme Court of the United States has, it appears, adjourned until May without disposing of the motion of the complainant to issue proper process for the enforcement of its decree; so that this Commonwealth, and this City must submit still longer to the injustice of the obstruction, and to the calumnies so industriously propagated. The complainants in the case have relied upon the justice and the propriety of their application, the defendants have been diligent in their efforts to excite public opinion against their opponents, and many persons find it much easier to join in an outcry, than to examine into its justice.

We have, therefore, thought that a plain brief statement of the facts of the case might be read when a labored argument would be disregarded.

First, then, we state that the Ohio river is a public highway, to be kept forever free for navigation without obstruction.

Second, The Wheeling Bridge is thrown over the channel of the river, and has obstructed the passage of some of our boats at various different times.

Third, The defendants allege that the boats whose passages were obstructed, had their chimnies of an unnecessary height. In reply to this allegation, the complainants produced the testimony of many scientific men, and practical Engineers to the effect, that high chimneys were necessary to great speed.

Thus was the case presented before the court, argued again and again, by able counsel on both sides, and after careful consideration; a majority of *five* out of seven of the judges of the highest judicial tribunal of the land, declared the bridge to be an obstruction to navigation, and of course a *nuisance*.

The two dissenting judges were C. J. Taney, from Baltimore, and Daniels from Virginia,—both liable to be biased by local feelings and influences.

While this cause was pending, the citizens of Wheeling determined to build a rival line of packets to run from that place to Louisville.—Several of these boats are now built and their chimnies are all taller than those of the Pittsburgh and Cincinnati packets.

Thus, the citizens of Wheeling have themselves furnished the most conclusive evidence, that their previous allegations about the unnecessary height of the chimnies of the Pittsburgh packets were groundless and false, and also proving the soundness of the opinions of scientific men and practical Engineers, that high chimnies were necessary to give great speed.

This, then, is the whole case of the Wheeling Bridge, as to the fact of obstruction of navigation. Will some of our cotemporaries who have joined in the outcry against Pittsburgh, do her the justice to publish it.

PITTSBURGH AND WASHINGTON RAILROAD.—This is the day named by the Commissioners for opening books for the subscription of stock to the Pittsburgh and Washington railroad.

The sum necessary to secure the charter is $50,000, and this sum must be subscribed during the time advertised by the Commissioners. The books will close on Thursday next.

Pittsburgh is looked to to subscribe *at least* one-half of it. The folks in the town of Washington do not regard the road with over-much favor, looking upon it as a sort of rival to the Hempfield road, and very little stock will be taken there. Along the line of the proposed road stock will be taken freely, but it is not anticipated that over $25,000 will be subscribed at present. The rest must come from here.

Policy, we think, dictates that Pittsburgh should not only take stock in this road enough to secure the charter, but enough to secure the control of the road, for the present. The road promises to be an important one, and as it is most likely to affect Pittsburgh interests, it ought to be under Pittsburgh control. It has been suggested that Pittsburgh should hold off from it, for awhile, until it is seen what is done in Virginia in reference to the right of way for the Steubenville road. This is urged upon the ground that if our Legislature adopt the pending proviso to the bill authorizing the Councils of Philadelphia to subscribe to the Hempfield road, Wheeling and Philadelphia will then abandon the Hempfield road east of Washington, and take hold of the Pittsburgh and Washington road as a means of connecting Wheeling with Philadelphia. In that case, Wheeling would have no inducement to withdraw her opposition to the right of way; and the Steubenville road would be sacrificed by means of the Washington road. This, we grant, would be a good reason for not letting the Washington road pass into Wheeling hands, but it furnishes, to our minds, the strongest possible argument for putting it at once into the control of Pittsburgh hands. With that road under our government, we could prevent Wheeling from taking any advantage of it until she yielded her opposition to the righteous demands of the Steubenville road. We hope, therefore, that Pittsburgh capitalists will walk up to-day, promptly, and take enough stock to secure the management of the road in hands that will not use it to our disadvantage.

"WEEKLY DISPATCH."—Our neighbors over the way have got out a "Weekly Dispatch," a copy of which is before us. It is very handsomely got up, and is furnished at $1 per annum, in advance.

MOVEMENTS OF BREADSTUFFS—The following is a statement of the exports of Breadstuffs to Great Britain and Ireland, from 1st September, 1851, to latest dates:

	Flour.	Corn Meal	Wheat.	Corn.
	bbls.	bbls.	bushels.	bush's.
New York,	408,513		2,296,508	171,362
New Orleans,	62,222		2,265	176,964
Philadelphia,	62,954		305,504	5,787
Baltimore,	97,966		118,973	3,600
Boston,	26,885		5,160	2,586
Other Ports,	8,000		30,180	28,515
Total for 1852	666,540		2,758,539	388,654
do last year	511,001	1,680	1,282,003	404,006
do 1851	811,256	2,987	787,999	417,690
do 1850	280,594	2,837	420,929	2,123,193

PLAIN BUSINESS TALK.

In noticing the new Finance Minister of the Government, yesterday, incidental allusion was made to the condition of money affairs at the time of his accession, as being not altogether different from another eventful period in the financial history of the country. Perhaps it is as well to speak to this point with a little more plainness. Occurrences within the last few days, render it, at least, timely, if not to all our readers, exactly palatable. The *Fourth of March* was signalized at this money centre of the country by a serious disagreement between two of the larger class of Banking Institutions in and near Wall street, resulting in the protest of one party, for want of Gold wherewith to pay its balances to the other, and in the intervention and assistance of third parties to set the matter right again. It is not pretended that the mere failure to respond on a weekly settlement day, grew out of the bankruptcy of the Institution which its neighbor dishonored. Indeed, we are told by an evening paper, it "was never stronger than at this moment, and will pursue its business undisturbed by these rumors." And this we take to be no very great exaggeration. The Bank, like two-thirds or three-fourths of its neighbors, is probably strong enough in everything but *Gold and Silver;* its PAPER assets ample, and its Debtor and Creditor columns equal the one to the other. That such is the case, the ready assistance of $300,000 or $400,000 granted by its neighbors, upon the transfer of a corresponding amount of its Bills Receivable, would seem to verify. No unnecessary panic, therefore, need be directed to the particular Bank in question. Its officers, President and Cashier, who honestly owned up on the 4th of March that they could not respond in Gold and Silver, have resigned, and the Bank is left to pursue its regular business under different auspices.

So much for the Wall street event of the 4th of March. The trouble indicated is, or is not, on the surface; is, or is not temporary. A correspondent sends us nine plausible reasons why money may soon be plenty again, but not one that looks beyond the daily ups and downs of the Stock Exchange. The trouble is deeper seated, and the spirit of adventure, of extravagance, and Currency expansion, too wide spread to be arrested by temporary expedients.

The root of the evil may not be found in overbuying of foreign Creditors, but this is one opinion, and it appears to be fortified by the weekly-recurring Custom-house figures, and the annual Treasury statements. But let this pass as tinged by party politics, and let us look to the branches. Bank expansion is one. The free use of Credits abroad another. False values for Real Estate a third. Exorbitant rents the fourth. Recklessness in Speculation the fifth. And extravagance in living and unreal estimates of what is called wealth, the sixth.—The catalogue might be swelled to a family tree of enormous dimensions, but these will suffice for present comment.

1. If Bank expansion be not arrested by the influence of the events of the past few days—such as the introduction of Wild Cat money from Illinois and Indiana, by one of the City Banks, in open defiance of popular opinion, and the failure to pay specie, on its authorized obligations, by another—then it must meet a more violent end. The spasms of the system may be frequent and violent, ever and anon giving hopes of prolonged vitality, but as specie-paying concerns they will all go to the wall together, unless the whole country, through which the spirit of adventure is now so rife, is brought to an early sense of the danger. California will not otherwise save them. Half this princely product of 1852 was sent abroad to pay for fabrics which ought to have been made at home, and the other half is now being hoarded by the people of the interior, who hold fast that which they know to be good, and transfer to others its uncertain paper representative. The Banks of this City are weaker in Gold now than in the Spring of 1852, and they owe fifteen or twenty millions more to their demand creditors. We even look in vain for a different result in the Banks of the neighboring cities.

2. The use of credits abroad will continue, while credit is left to the country. Those who take them profit by our very poverty as a manufacturing people. Great Britain exports $355,000,000 in the fabrics of her own workshops; we export $25,000,000 in home manufactures and consume $175,000,000 in Foreign; besides using $30,000,000 additional in the free produce of the Indies. The advantage to the Foreign creditor is great. He will not withhold easy facilities to continue the business. We therefore look to no very abrupt check in Bond bartering.

3. False values to Real Estate must soon cease. The fabric of speculation begins to totter. The speculators find it uncomfortable to be hard up for money, and yet more uncomfortable to be reminded by the turn of the market, that they are probably far ahead of the times.

4. Rents will follow, and both these results are not only desirable to healthy trade and honest tenants, but they are as absolutely essential to the safety of the Banks as the daily calls which they are now so industriously making on their fancy stock loans.

5. 6. Speculation of every other species, and the inducement which it holds out to extravagance in personal and household expenditure, all constitute together one of the threatened evils of the day which nearly concern every good citizen, and every prudent man of business. It is this vicious spirit that has made our new and "princely Hotels" a mark of derision, and the projects and jobs and contracts of municipal legislation the source of corruption and common disgrace to the City. It is this, too, that has established twenty-five or thirty new Banks in our midst, thus doubling the number which formerly served a more safe and useful purpose, and increasing the danger of universal explosion by the false credits in which they were conceived and by which they are for the most part conducted.

These are plain words. It is about time, we think, to speak plainly.—*N. Y. Times.*

The Wheeling Gazette, in decidedly the most rational article on the right of way, that has ever appeared in its columns, in reply to the Washington Reporter, makes a clear breast of the matter. It says that the faith of the city is pledged to the Ohio Railroads to oppose it, that these roads have already expended $2,000,000 on the strength of the pledge, that the Ohio roads are regarded as more important than all the other roads put together, and finally, that for Wheeling to countenance the right of way, is entirely out of the question. So then, it is not for protection against Pittsburgh, after all, that she has been besieging the Legislature, and appealing to their sympathies, but it appears she has sold herself, body, soul and breeches, and all her neighbors into the bargain, to the Railroad companies of Ohio, and wishes to inveigle the Legislature into backing her nefarious bargains, and inflicting an act of rank injustice on her neighbors. When however the truth comes out, the Legislature may not be found so pliant, especially since the Russell and Ellet Bridge notice has been shown to be a contemptible humbug, and perhaps an actionable conspiracy.—She is blind and venomous as an August rattlesnake, and may yet, get neither the Ohio roads, the Hempfield, or even the Cleveland—nothing but the Washington connection with Pittsburgh. Then, she may discover her situation.—*Wellsburgh Herald.*

BUFFALO, March 8.—A collision occurred last evening within the city limits, which was attended with serious consequences. The six o'clock train on the Buffalo and Rochester railroad left the Depot according to the time table, and in crossing the track of the New York city railroad, an incoming train of the latter ran into and demolished the rear car of the train on the Buffalo and Rochester road.

There were from twelve to fifteen passengers in the car at the time the accident occurred.—Nearly all of them were more or less injured—some of them quite severely. One man, named Tyrrell, was thrown a considerable distance, and was badly hurt, but will probably survive the injuries. The names of the remainder we were not able to learn.

SENTENCE OF THE MADIAI.

The following Judicial Sentence of Francesco and Rosa Madiai, embodying a statement of the offence (or offences) whereof they were found guilty, is translated for the New York Tribune, from the Univers, a leading Catholic journal issued in Paris:

Considering that the penal laws, agreeing with the interpretations of the most illustrious jurists, recognise proselytism as a crime punishable by the civil authorities—

"Considering that Francesco and Rosa Madiai, born and brought up in the Catholic religion, have, within the last four or five years, been induced to abandon it and embrace the religion which they call Evangelical—

That Francesco Madiai, availing himself of the lessons in the French language which he gave to a young man of 16, endeavored, though without success, to detach him from the Catholic religion; gave him, in concert with his wife, a prohibited copy of the Bible in French and Italian—

That he has made to other persons proposals tending to show the superiority of the religion called Evangelical to the Catholic religion, counselling such persons not to hear the priests, reproving the worship of the Virgin Mary and of the Saints as an idolatry, and especially turning into derision the pious custom of burning tapers before the image of the Holy Virgin—rejecting the doctrine of the Real Presence in the consecrated Host, characterizing as an insult towards God intercession by the Virgin and the Saints, rejecting the authority of the Supreme Pontiff, saying that the observance of the feast days other than Sundays, and abstinence from certain aliments were the inventions of sinful men; saying that the sacrament of the Communion, the transubstantiation of bread and wine is not true, that Confession is useless, because it is made to man and not to God—

That to make a young girl of twenty, who was in their service, abandon her religion, the Madiais taught her to read, so that she might understand the books which they gave her, such as the Bible translated by Diodati, and the Book of Prayer, printed in London by the Society for the diffusion of the Christian Doctrine, in which it is said that Purgatory and the worship of images are ridiculous inventions—

Considering that what has been said by the defence on the subject of liberty of conscience and of religious tolerance is foreign to the question, seeing that the first is not attacked when citizens are called to answer for their external acts, and that the second is protected, instead of being violated, when one preserves another from the danger of seduction and abandonment of her religion.

The Court declares that the crime of impiety has been committed by the Madiais in the way of proselytism—and it condemns Francesco Madiai to fifty months' imprisonment at hard labor, and Rosa Madiai to forty-five months' imprisonment, and to a fine of 300 livres—and at the expiration of their punishment to three years' surveillance by the Police.

The election yesterday demonstrated to Bishop Lefevre two most important facts. One of which was that he can use only the more mercenary and vicious portion of the Democratic party in any scheme which they believe to be unjust and anti-Republican, and the other was that he cannot rely even on the whole Catholic population to follow him in a crusade against American Institutions. The great mass of the Democratic party of Protestant belief and all the better and more intelligent and honest portion of it, indignantly spurned an alliance with him, that required them to prostitute themselves to his unholy anti-Democratic purpose. Like men who love the State and country and their institutions far more than party, they took a brave and manly stand against Priestly dictation.

Equally manly was the conduct of many of our Catholic citizens. They threw off the shackles which had so long bound them, and did themselves the high honor of voting to sustain our free schools in spite of all attempts to control them. Even many of the Irish Catholics refused to give their influence against education and Republicanism. But it is to the German and French Catholics that we are under especial obligations for their manly independence, for a large portion of them voted the Free School ticket throughout. In this they have consulted their own interest, as well as their duty and the welfare of the State, and this election will result in more substantial good to the Catholic population of the city than to any other class. But of this we have not time to speak to-day. They have contributed to break the chains with which their priests were striving to fetter them, and have helped to preserve to themselves as well as to others, the advantages of our free schools and the blessings of a useful education.—*Detroit Tribune.*

The debtor banks have been hard run this last week, and settlement day did not pass over without an exposure.

Several banks, we understand, were weak and had to borrow largely out of the street; but they borrowed in time to meet the demand on them. One bank, however, was thoroughly cornered, and admitted its inability to redeem the balances against it in specie. When this became known in general to the banks, four of the strong ones volunteered to loan the cornered institution $400,000 in specie, through the means of which it is said to be speedily gaining renewed strength. The Bank in question was one of those established within a year or so, the Hanover Bank, which no doubt has been locking up its funds in large discounts! Its published statements for September and December, 1852, exhibit no glaring excess in its movements. It has been doing a fair business; and from the large capital which it possesses, we should judge the *corner* to have been one created by too great confidence in the continued ease of the market.—The difficulty is, for the moment, passed over, but it leaves a lesson of deep importance to the community.—*N. Y. Merc. Journal.*

There appears to be more in the telegraph dispatch received at Liverpool from London on the day of the sailing of the steamer than we supposed. A letter from Messrs. Brown, Shipley & Co. states that such a dispatch has been received; that the Bank has issued the usual notice that loans on stock and other sufficient securities will be made at 2½ cent. No change in the discount rates is made. It would appear from this course, and from the reduction of the rate in Exchequer bills, that neither the Bank nor Government look for any continued or serious stringency in money, but that the action of the Bank was adopted to check speculation.—*N. Y. Trib.*

HEAVY CARGO.—The ship "Ellerslie," which arrived here yesterday from Rio de Janeiro, brought seventy-one hundred and two bags of coffee—a cargo that is said to be the largest of its kind ever received at this port, and greater than any except one or two, ever imported into this country. The barque "St. James" also arrived with forty-one hundred and forty-six bags—making a total of eleven thousand two hundred and forty-eight bags imported into this place in one day.

This is but adding another evidence to the many which have recently occurred, of the rapid increase of our commerce, and the general growth of the city in prosperity.

The extensive enlargement of the trade of Philadelphia in the single article of coffee is shown by the following comparative statement:

The total imports of this commodity in March
1851 was 8,001 bags.
Ditto in 1852, was 9,772 "

Making an aggregate of seventeen thousand seven hundred and seventy three bags—while in only nine days of March of the present year twenty-two thousand five hundred and forty-four bags have been imported—being forty-seven hundred and seventy-one bags more in nine days of March, 1853, than the combined importations in the same month of the two next preceding years.

This certainly is an immense increase. Yet notwithstanding the greatly multiplied receipts, there is a less stock on hand at this point. The fact is attributable to a very considerably augmented demand for coffee in this market by Southern and Western buyers—a circumstance that can be ascribed to no other cause than our improved facilities of communication with the interior, and a growing spirit of enterprise on the part of dealers, who now seem determined to make Philadelphia what it should, and can, be made as a point of import. We should add, in closing this paragraph, that other vessels are reported on their way to this port with cargoes of coffee which will swell the whole imports for this month to twenty-five or twenty-six thousand bags.—*Phila North Amer.*

A BEAR SHOT WITH A CANDLE.—A few days ago a large bear, owned by Mr. Privat, who resides on the Peninsula, opposite Toronto (Canada), was shot in rather a novel manner—a common candle having been put in place of a ball into the gun. The candle entered immediately behind the ear, and almost instantly deprived the animal of life. It was very fat, and was about 4 years old.

FOREIGN ITEMS.—During the past week information had been received at Lloyd's of the wreck of three ships with emigrants to Australia, with nearly 1000 passengers, all of whom were saved. The ships were the Sir Fowell Buxton, lost off Point Tuburas, Rio Grande, Dec. 11; the Eglinton, Sept. 8, near Freemantle, Australia, and the Express, date blank, near Sidney.

A new Company had been announced, under the name of the "Spanish and Portuguese Screw Steamship Company."

Two hundred and five vessels were on the berth at the British home ports, for the Australian colonies, comprising 96,000 tons, with no scarcity of either passengers or cargoes.

The Pharmaceutical Society had taken up the subject of the adulteration of American lard, and were submitting various samples to analysis.

A letter from St. Petersburg states, that on the morning of the 26th ult. there were 467 cholera patients in that city. In the course of the day there were 82 new cases, 40 cures, and 14 deaths.

FROM THE WEST COAST OF AFRICA.—By the Favorita, Capt. White, news from Bathurst to Feb. 3 has been received.

The Favorita reports the U. S. ship John Adams at Bathurst, River Gambia, Jan. 15. The John Adams had visited Goree, and sailed from Bathurst on the afternoon of the 15th inst, for Sierra Leone. Her presence on the coast had been of much benefit, as the natives far and near knew of her arrival and being at Goree and Bathurst.

Commander Lynch arrived at Bathurst on the 14th inst., in the English mail steamer Forerunner, from London, and took passage in the John Adams for the coast of Liberia.

A religious war was waging among the different tribes, the difficulty being about drinking—the Mirabous being the Maine Liquor Law and Mahommedan party, and those going for the fire water of the whites and heathen are the Mandegoes, Serawollows, and the King of Combo. Trade was much interrupted by the existing difficulties. The King of Combo attacked the town of Savaga, containing some 4000 inhabitants, on the 23d Dec., and was repulsed by the Mirabous with a loss of 17 men, the latter losing but one man, and he a trader.

His Excellency the Governor of Bathurst would take the matter in hand. A settlement of the difficulties might be expected.—*N. Y. Jour. Com.*

ONE HUNDRED MILES PER HOUR.—"A Maine Yankee" announces, through the National Intelligencer, the invention of a form of road and improved locomotive, which, he says, will safely transport the mails and passengers at the rate of one hundred miles per hour! The writer further says he has been made acquainted with the details of these improvements, "which are so palpably correct in theory, and feasible in practice, that every civil engineer and railroad man will, on examination, at once recognise and admit, as the desideratum, even to the extent of safety and speed above indicated." The next Congress, it is said, is to be invited to secure its adoption, and give to the world the result of the first experiment.

A late letter from Paris, says:—"A better and more worthy tone is perceptible in the public mind in regard to the Empress. She rides out every day from three to five, and the four exits from the palace are all left open, that the people may not know through which she is to pass. A division of the crowd is thus effected. She speaks English and French vernacularly, although Spanish is her native language. The relations to be maintained by her toward her mother are not fully understood. She has not left Paris, and yet she has been at none of the fetes given to her daughter. She has appeared in public only once since the marriage—at the opening of the legislative session."

NEW YORK RELIGION.—The New York Home Journal says, there are frequently not more than six persons present at the week day services of Trinity Church!

Indiana has a moderate anti-liquor bill ordered to a third reading in the House by 58 yeas to 44 nays.

SHERIDAN KNOWLES.—This well known author and actor recently left the stage and became a Baptist clergyman.

It appears from statistical returns, published in the Annuaire des Bureau des Longitudes, that during the year 1851 there were consumed in Paris 1,070,926f. worth of oysters, which, at the average rate of 2f. 30s. the hundred, gives nearly seventy millions as the consumption of the capital.

The Charleston Mercury announces the death of the Hon. Joshua J. Ward, who died at his plantation on Sunday from an attack of paralysis.—He was in the 53d year of his age, and was the largest and most successful rich planter in South Carolina. He was for many years a State Senator, and at his death was Lieutenant Governor of the State.

It is stated that Currer Bell, alias Miss Bronte, was at one period of her life a governess in the family of Mr. Thackeray, and that she had that distinguished author in her mind's eye when she drew the character of Rochester in "Jane Eyre."

Mr. Irving has been occupying himself during a part of his visit with Mr. Kennedy, Secretary of the Navy, in Washington, with researches in the public offices, for his "Personal Memoirs" of the Father of his Country.

Mr. Fillmore, son of the ex-President, it is said, will form a law partnership in the city of New York, with a son of Mr. Corwin.

HANDSOME DONATIONS.—Each insurance company in Mobile has agreed to donate $300 annually to the Fire Department of that city.

We learn that contracts have been made with Messrs. Palm & Robertson, of this city, for the building of several Locomotives to be used upon the Ohio and Mississippi Railroad.—*St. Louis Republican.*

NEW ORLEANS, March 7th.—The British ship Belmont, nearly loaded with 3000 bales of cotton for Liverpool, took fire this morning, and was scuttled and sunk. All the cotton in her was either burned or damaged. The American ship Maine, lying alongside, which had just commenced loading, took fire in the rigging, and was slightly damaged.

The Legislature of Maryland have rejected the Air-Line Railroad proposition, by a decided vote. The proposition thus stands condemned by both New Jersey and Maryland, without whose concurrence it can never go into effect.

IRON TURNPIKE.—Iron will be the great material for almost everything at the proper time. A company is being organized at Cincinnati, O., to pave the turnpike from the head of Western avenue, at Brighton, to Cumminsville, Spring Grove and Carthage, with iron plates. The sides of the road will be filled in with dirt, and ornamented with shade trees. The suggestion is a good one, and will make the road a fashionable "drive."

The mother of the girl Corcoran yesterday afternoon visited the house of Deacon Carter in Charlestown, and used all the persuasion in her power to induce her to renounce her faith. This Hannah would not do, and the mother left the premises in a highly exasperated frame of mind.—*Boston Bee of 9th.*

Queen Victoria, it is said, is haunted with an idea that she will be driven from the English throne by a revolution, and is therefore investing largely in U. S. securities. It is even said that the Barings have purchased for her at least half a street in the city of New York.

We learn from the Elk County Advocate, that six full grown Panthers were killed in that county a few weeks since. The largest measured thirteen feet from the point of the nose to the end of the tail.

King Maximilian of Bavaria, who has lately been in Rome, in his interviews with the Pope, declined kissing his hand, and only paid him the ordinary civilities. The journals denounced him as half a Protestant, and the Roman nobles absented themselves from his levees.

The Archbishop of Paris has published a condemnation of the *Univers* newspaper, on his authority as a Roman Catholic prelate. He prohibits all ecclesiastics from reading it or writing for it, and all religious communities in his diocese from perusing it.

Alexander Dumas has finally arranged his romance of Isaac Laquedem so as to continue its publication, without wounding the susceptibilities of the Jesuits.

The new Territory of Washington, created by the last Congress, comprises that part of Oregon which lies North of the channel of Columbia river, to where it crosses the 46th degree of latitude, and thence along said degree of latitude to the top of the Rocky Mountains. The land occupied by missionary stations, not exceeding 640 acres to each, together with improvements, is expressly confirmed to the Missionary Societies respectively, which established the same.—Stations that were so occupied prior to the passage of the Act organizing the Territory of Oregon, are also confirmed to the Societies which established them, even though they have since been abandoned.

THE PULSZKY'S ON THE UNITED STATES.—The new book on the United States, by Francis and Teresa Pulszky is announced in the English journals, by the title of "White, Red, Black: Sketches of Society in the United States during the visit of their Guest."

A CONNECTICUT SILVER MINE.—The Middletown, Conn., silver mine has recently been sold for $50,000. It was bought about a year ago for less than $5000.

On St. Valentine's day 350,000 letters passed through the London Post Office.

The Crystal Palace, New York, is getting along slowly. The workmen have reached the third story; still they say they will have it ready by the day appointed for opening the exhibition.

The Freeman's Journal of New York, claims for the Pope of Rome the following extensive limits:—"The Pope of Rome has rights, that is, spiritual rights, and supreme authority in every diocese, and over every square foot on this globe. His rights are circumscribed only by the ends of the earth, and the consummation of ages."

MAPLE SUGAR.—At a late meeting of the Farmers' Club of New York, an article was read on the subject of maple sugar and of its great importance as one of the products of our country. By the late census it appears that the production of maple sugar in this country in 1850 was within a small fraction of thirty-four millions of pounds. An orchard of maple trees has been found almost equal, acre for acre, with the sugar cane in producing sugar and molasses.

FATAL JUGGLING.—The man Day, who tried to swallow a sword, at a Juggler's exhibition, in Sankvills, Washington county, last week, has died from the effects of the experiment.—*Milwaukee Sentinel.*

NEW YORK MINT.—The New York Journal of Commerce says:—

The Assay Office about to be established in this city by virtue of an appropriation of $100,000 made at the recent session of Congress, will probably expand into a Branch Mint, and perhaps will eventually absorb the mother Mint, now at Philadelphia. In the meantime, as an Assay Office, it will produce an important change in the disposition of the gold dust arriving here from California. Instead of being sent to Philadelphia for coinage, most of it will be sent to the Assay Office here, and be cast into bars, discs, slugs and ingots, having a specified value, and being in all respects equal to coin as a legal tender.

BRAZIL COFFEE TRADE.—We have collected from reliable sources, some items of information in relation to the important article of Coffee, which will not be without interest to our readers.

A well informed gentleman of Rio de Janeiro furnishes, under date of the 15th January, the following estimate with regard to the crop now in process of shipment:

Exports from 1st Aug. to 31st Dec., 1852, 1,017,524 bags.
Do. from 1st to 15th January, 1853, 106,707 "
Stock at Rio on 15th January 70,000 bags; 1,124,231
Crop of low land, 450,000 bags.
" of highland, 1,350,000 "
Total crop, 1,800,000 "
The crop of lowland is all disposed of.
Of the highland crop one-half is believed to be left in the country, viz: 675,000 bags
Total supply which can be expected from the present crop, 745,000 bags.

This estimate is believed to be rather over than under the actual quantity now left in the country, as many of the smaller planters have less than half, and some no part of their crops on hand.

It will hence be perceived that if Europe takes half the quantity yet left in Brazil, there will remain for the supply of this country, we may say, for five months, but 372,000 bags, or a monthly supply of only 74,500 bags. This, taken in connection with the anticipated material falling off in the next crop of Brazil, and the small spring sales of the Dutch Company, 340,000 bags, certainly furnishes good ground for confidence in the article, and some improvement may reasonably be expected.—*Balt. Amer.*

We had the pleasure yesterday of taking by the hand Capt. Jas. May, of Pittsburgh, who is now on a visit to our city. Although comparatively a young man, Capt. May is one of the few surviving pioneers of steamboat navigation upon the western waters, and as early as 1822 was well known on the Ohio and lower Mississippi rivers. From 1826 until 1832 the various boats owned and commanded by him were regular traders to this port, and during those years he performed at least fifty voyages to the upper Mississippi. When he was driving a large and profitable business to Galena, there were few or no woodyards above this city, and his crews had to obtain the fuel by felling the timber in the forest. Alton, Hannibal, Quincy, and other flourishing cities, were scarcely known on the map, and Keokuk, Burlington, Muscatine and Davenport, which are advancing with a gigantic stride in population and wealth, had no existence. The Indian was "master of all he surveyed," from the lower rapids to St. Paul, a place that is now as well known as any other city in the country. We presume that Capt. M. has been engaged in boating for a longer period than any other man born in Missouri, and many of our readers will be surprised to learn that he is a native of Ste. Genevieve county. In 1834 he became extensively engaged in mercantile pursuits at Pittsburgh, and in connection with his steamboat operations prospered exceedingly well. He built or superintended many of the most popular boats that ever came to our levee, and all of our old commanders availed themselves of his experience and skill, whenever they built boats on the upper Ohio. Capt. May, we understand, means to remove to Iowa in order to look after his extensive landed property near Davenport and Rock Island, and should he do so our sister State will receive an addition of an accomplished business man, and a sterling democrat.—*St Louis Union.*

AT the Theatre Francais, the other night, M. Arsene Houssaye, the Manager, received the Emperor and Empress, in full dress, wearing a sword, and with a candelabre, and four candles in one hand. Escorting them to their box he went backwards, and his sword caught in an ornamental shrub, throwing him down and smearing his embroidered coat with the melted wax of the candles.

OPENING OF THE ILLINOIS AND MICHIGAN CANAL.—The Chicago Tribune of Friday last says, that a telegraph despatch from Mr. Talcott, the Chief Engineer, to John H. Kinzie, Esq., collector in that city, was received there on the 3d inst. containing the gratifying intelligence that the canal will be opened for use on the 15th inst.

Wisconsin will get no Maine law this winter. A majority report has been made against it in the Senate.

"There is no other Worm Medicine as good."

So says a physician, in speaking of the celebrated Vermifuge of Dr. M'Lane. The following is an extract from his certificate:

FULTON COUNTY, Ind. Feb. 23, 1850.
Messrs. Kidd & Co.—Gents: I have been using your Dr. M'Lane's Worm Specific in my practice, and have found no other worm medicine as good. I have been buying it from the Druggists in Rochester and Logansport by the dozen. As it is first rate, I would like to have it from you direct. Respectfully, yours, PETER TROUTMAN.

If your children are troubled with worms, go at once and get some of that incomparable Vermifuge.
For sale by most druggists and merchants in town and country, and wholesale and retail by J. KIDD & CO., Sole proprietors, 60 Wood street. mh10

NOTICE—M. McGINLEY would inform his friends and the public generally, that he has removed his choice stock of CIGARS and TOBACCO, from his old stand, 114 Water street, to the Room No. 121 under the Monongahela House, next door to the Firemens' Insurance Company, where he will endeavor, as heretofore, to keep one of the best stocks of Imported Cigars in the city. He flatters himself that the stock of Cigars and Tobacco he is in the habit of offering for sale, are sufficiently well known to need no other recommendation to secure for him, at his new stand, the same patronage as he received at his former place of business. [fe26-lm

WINES, &c—Persons wishing to purchase FOREIGN WINES and LIQUORS of all descriptions, pure as imported, can obtain them, at the lowest prices, at the Wine Store of JACOB WEAVER, Jr., Market and Front streets. oc15

BURKE & BARNES' SAFES—Here is the kind of testimony as to the value of our SAFES, upon which we can confidently rest the reputation of our work. We have already published several certificates, proving that Safes made for our regular and ordinary sales, and sold abroad, have been subjected to the SEVEREST TESTS IN ACTUAL CONFLAGRATIONS, and preserved their contents totally free from damage. The following is another proof of the same incontestable character:—

$10,000 WORTH OF BOOKS AND PAPERS SAVED WITH A $40 SAFE!

ALBION, Erie County, Pa., November 12, 1852.
Messrs. Burke & Barnes—Dear Sirs: Your two letters were duly received. I was absent at the time. I would say in regard to your Safe, I consider it perfectly FIRE PROOF. I tested it—one I bought of you last fall on the morning of the 10th of June last—my store building being burned to ashes. It was built of wood and brick—a large three story building. My Safe was in it at the time of the fire, and fell into the cellar, where there was a large amount of oil. It was a very hot fire.
My notes and book accounts that were in the Safe, amounted to about Ten Thousand Dollars, which were saved. There was not a *single paper injured;* and further, I would advise any person who is doing business, to lose no time, but buy a Safe to keep their papers, &c., in—and get one that is good. I can safely recommend your Safes to any one. Yours, truly, JOHN CLARKE. fe24tf

Citizen's Insurance Company of Pittsburgh
H. D. KING, President. SAMUEL L. MARSHELL, Sec'y.

DAGUERREOTYPES AT THE NATIONAL GALLERY.
JACKSON'S National Daguerrean Gallery, corner of the Diamond and Market street, (opposite L. Wilcox's Drug Store,) Pittsburgh.
Ladies and Gentlemen wishing to obtain lifelike likenesses at moderate prices, will please call at the above establishment, fitted up with very superior Side and Sky Lights, arranged with such skill that the operator can take the most accurate the similies of the human form with all the expression of animated life, in ALL WEATHERS.
Engravings, Paintings, &c., accurately copied, and duplicates taken of original likenesses.
Persons not required to take a picture, unless a perfect resemblance.
Likenesses taken of sick and deceased persons in any part of the city and vicinity.
Rooms open, and operating from 8 A. M., until 6 P. M. Entrance in the Diamond.

Nelson's First Premium DAGUERREOTYPES.
Post Office Building, Third Street.
CITIZENS and strangers who wish to obtain an accurate, artistic and life like likeness, at a very moderate price, will find it to their interest to call at this well known establishment, where entire satisfaction is guaranteed, or no charge made. Having one of the largest and best arranged Side and Skylights ever constructed for the purpose, with instruments of the most powerful kind, and having adopted the system of Daguerreotyping, as now practiced by the celebrated Roots, of Philadelphia and New York, Mr. N. flatters himself to be able to offer to the patrons of the Art, a style of Daguerreotype, either singly or in groups, which has never been surpassed.
Rooms open and operating, in all weathers, from 8 o'clock A. M. to 6 P. M.

We believe Nature has provided a remedy for every disease which flesh is heir to. KIER'S PETROLEUM or ROCK OIL, put up as it flows, from the great laboratory, concealed deep in the bowels of Mother Earth, is, without doubt, one of the greatest of these remedies. Read the following testimony, given by a grateful parent:
PLEASANT VALLEY, Ohio, Sept. 15, 1852.
Mr. S. M. Kier—Sir: I have sold all your Petroleum, or Rock Oil, some two months past, and have been looking for your agent to get a further supply. I could have sold some dozen more. We have found the Oil very excellent in Flux and Dysentery. My daughter, at the time your agent was here, was lying very low with the flux; I gave her a teaspoonful, and in three hours gave the second, and the flux stopped, and she recovered immediately. It is also an extraordinary remedy for sore and inflamed Eyes, Cuts, Bruises, and Rheumatism, and for the Piles; some have been cured of long standing. Yours, with respect, ISAAC BIGELOW.
For sale by all the Druggists in Pittsburgh.
fe9 [Papers advertising Petroleum please copy.]

NEW CARPET STORE.

"Excelsior Line" to Lawrenceville and the Cemetery.
THE public are respectfully informed that the old Line, known as "NASSERS," has been purchased by the "EXCELSIOR LINE," and that several new and splendid OMNIBUSSES will immediately be put upon the road. For the greater comfort and convenience of passengers, an office and station has been taken in Fifth street, between Market and Liberty, adjoining the Exchange Office of Mr. Harris, which will be opened on Monday next, March 7th, and from whence TWELVE OMNIBUSSES will shortly be run between Pittsburgh and the above places, at the very shortest intervals, the drivers being strictly restricted to time. In short, no pains will be spared to give general satisfaction. Any complaints which may be made at the office will be attended to. JOSEPH SNOWDEN, Agent. mh4tf
