MONDAY MORNING, JUNE 27, 1853.

GENERAL OF THE JESUITS.—From the Parisian miscellanies in the Courier des Etats Unis we learn that the general congregation of the Jesuits is to meet on the 21st June inst., and proceed to the election of a new General of the Jesuits, in the place of the reverend father Roothaan, lately deceased. The general is elected for life, and the powers with which he is clothed by the constitutions are more considerable than those conferred by any other religious order. Until this election takes place, the Jesuit Society is governed by the reverend father Pierling, assistant for Germany, whom the reverend father Roothaan at an early stage of his sickness appointed vicar general.

A COMPANION FOR THE YOUNG LADY WHO WEARS THE BREECHES.—Facts brought to light Saturday evening, prove conclusively that the young lady who so recently visited many cities in the Union in male attire, is not the only person dissatisfied with her cast in life. She donned the breeches to travel. A man named Michael Bellow, in this city, has donned the petticoats to more successfully charm young men. It is stated that Michael assumed this garb for the purpose of inducing young men to accompany him home, and then extort money from them. He was arrested Saturday evening, and yesterday morning committed to answer to the charge of deception.—*Albany Argus.*

THE DEPARTURE OF THE LEANDER.—We regret to learn that it has been determined that the British frigate Leander shall not return to this port after her departure next week for Halifax. One of the principal reasons for this change of purpose is the frequent desertions of her men, twenty-five of whom have already escaped; and the lack of undisputed powers to reclaim them in this port. Two were seen from the deck of the frigate on board of an American vessel the other day, on which they had shipped for a foreign port. The officers did not wish to compromise the peaceful and friendly objects of the mission by sending for them, and to protect themselves from further losses, it has been deemed the least troublesome course to leave the port.—*New York Post.*

SLAVE ESCAPED.—A maned named George Slasher got on board the Telegraph No. 3 at Rising Sun, on Friday night, with a slave, bound for Greensupsburg, Ky. He locked the negro in a state room, and proceeded to enjoy himself.—Just after returning from a visit to the saloon, he heard a splash in the water, and soon discovered that his slave was gone. The supposition is that the fellow jumped overboard and swam ashore.—*Cin. Com., 20th.*

IMPORTANT TO HOUSEKEEPERS!

SOMETHING better and more economical than Soda, Cream Tartar, or any other preparation in existence, for making GOOD, WHOLESOME, HEALTHY BREAD, is HARRIS'S BAKING POWDER, for raising Bread, Biscuit, Fried, Griddle and Johnny Cakes, Puddings, Pot-Pies, Corn Bread, Dumplings, Apple Dumplings, Pastry, &c., &c. This article is one that every family, Hotel, Boarding House, Ship, Steamboat, Saloon, Factory, Camp, &c., should find, upon a careful trial, to be the very thing every single family has been in want of.

It is most important and unique over the old system, are: 1st It saves the expense of milk, eggs, shortening, spoiled bread, &c., and the labor and chance of procuring good yeast.—water only being necessary.

2d. No waiting for the dough to rise before baking: consequently bread may be made in a few minutes.

3d. A more delicious, wholesome, light, sweet, tender and palatable bread and biscuit, whether the flour be of the best quality or not.

4th. The bread made process is much more nutritious, easier of digestion, better fitted for a weak stomach or sedentary habit, than when made with yeast.

5. The bread made by fermentation, does not afford the same amount of nourishment to the system, that it does when made with this compound; because the vegetable and animal substance is wasted by the process of the action of the gastric fluid upon it, and consequently, a part only goes to nourish the body, while the acids ten' ency is to create a diseased state of the blood, &c.

This article has been thoroughly tested, and is universally liked. Many families have used it from its first introduction, 18 months since, and pronounce it unsurpassed by any similar article in use.

Be sure and ask for DURKEE'S BAKING POWDER, and take no other; and you will not be deceived. Principal office, 104 Water street, New York. Sold by the best grocers and druggists generally.

Prescribed by Physicians.

PHYSICIANS everywhere prescribe B. A. FAHNESTOCK'S VERMIFUGE, for the reason that they can place implicit confidence in it. Read the following statement, from a gentleman with whom it has been for many years!

BRAZILIA, Ind., Sept. 21, 1852.

Messrs. B. A. Fahnestock & Co.—Gentlemen: It gives me pleasure to state, that I have been selling your Vermifuge for some time, and during that time I have also sold other Vermifuges and preparations, and can unhesitatingly say that none have universally given satisfaction to all who have used it, and was generally used and prescribed by physicians in this locality, and vicinity, where I also reside, and during the same time, used it up to May 1852. I have, during the same time, used it in my family with the best success, when other preparations have failed of their desired effect.

Yours, respectfully, THOMAS FOX, Jr.

CAUTION.—Beware of counterfeits and imitations. Sold wholesale retail by the principal druggists' and country merchants throughout the U. States. [m19

TESTIMONY FROM TENNESSEE IN DEFENCE OF B. A. FAHNESTOCK'S VERMIFUGE.—The Nashville Union says: "We call the attention of our readers to the certificate of Mr. John Berriford, in favor of B. A. Fahnestock's Vermifuge. The gentleman is well known in this community, and anything he says can be relied on."

Messrs. B. A. FAHNESTOCK & Co.—Gentlemen: For the benefit of others, I take pleasure in testifying to the valuable qualities of your Vermifuge. About ten years ago my attention was first called to it by a friend, an officer in one of the Banks in Nashville, who was doubtful as to was then a standard article, having used it in his family with very satisfactory results. By his advice I took a vial home for one of my children, who had until then been very feeble and subject to frequent sickness. The Vermifuge expelled a great number of Worms, and the child afterwards gradually recovered good health. I have since used it regularly in my family for most of the ailments of children, and generally with good effect.

One remarkable case, in the family of a near relation, I will mention in particular. The child was about four years of age, had always been puny; often attacked with severe pains, and, at the age mentioned, nearly lost the use of the lower extremities. I recommended the use of your Vermifuge in the case, and left the half of a vial which I was taking home, with directions for its use. I learned afterwards that the child passed an enormous bulk of large Worms—the number not ascertained—and, in a short time, to the use of the Vermifuge, the increased and health began to improve. When I next saw the child, she was coming and enjoying perfect health. This recovery, from the very jaws of death, the friends attribute to the use of your Vermifuge.

PROFESSOR ALEX. C. BARRY'S TRICOPHEROUS, or Medicated Compound, for beautifying, improving and preserving the hair, curing cutaneous, burns, stings, rheumatism, and all irritations of the skin. A preparation, the sale of which amounts to one million of bottles annually, and is used by need no advertisement but as the thousands who purchase, use and approve of it freely proclaim; no idea of the enormous extent of the business done by Professor Barry, he gives herewith a plain statement of the facts derived from his books, and with them tenders his earnest and hearty thanks to his innumerable patrons.

Professor Barry's accounts of sales for the year 1852 show that during that year about 940,000 bottles of his Tricopherous were disposed of, and that the cash product of this immense sale was nearly $100,000.

This plain, unvarnished fact is a better commentary on the value of the article than anything its inventor could say. If it were not peerless in its way it could upon the bare assertion of a household remedy for cuts, bruises, burns, sting, skin diseases, &c.—it would not, of course, sell universally in Germany, Australia, and nearly every civilized public would buy it at any price, but Professor Barry has not found it to a fortune so low that its poorest can avail themselves of its benefits.

Sold in large bottles (price 25 cents,) at wholesale and retail, at the Manufactory and Depot, No. 197 Broadway, New York, and by the principal Merchants and Druggists throughout the United States and Canada. Mexico, West Indies, Great Britain, France, &c., and by

SAVE YOUR ICE.
Burnet's Patent Water Cooler.

WE are now prepared to offer our friends and customers a superior article of WATER COOLERS of entire new styles and at greatly reduced prices. These coolers in the result of the application of scientific principles to the purpose intended, viz: to keep water as cool as possible, as long as possible, and with the least possible quantity of ice.

The proprietor has long devoted his attention to this particular branch of domestic economy, and in passing from one improvement to another, has, at length, arrived at what we consider as it is possible to reach. A proof of this is found in the several hundred of these coolers now in all parts of the country. A single trial of the simple statement of facts in regard to these Coolers, will satisfy every one of their superiority. First, they are the only article of the kind ever patented. They are furnished with two distinct non-conducting chambers, by means of which, with two pounds of ice in the while water is kept at a temperature of 60° above zero, or 45° from freezing (all day). Thus, at a cost of 25 cents per day, a family or ordinary size can be constantly supplied with water as cold as low thrifty large numbers in the same proportion. This has been found by actual experiment to be a saving of at least seventy-five per cent. over the earthen jars formerly used for this purpose.

Again, these Coolers NEVER SWEAT, in this way saving much unnecessary waste and trouble.

Being manufactured in the most workmanlike style, and handsomely finished in every respect, they make a beautiful ornament to any room, being at the same time

An important improvement has lately been added to the Cooler, viz: a small apparatus for filling from ice to eight pounds of butter) inserted directly under the cover. This quantity of butter can be kept perfectly sweet all day, without additional ice; a very important addition to the economy and comfort of a city residence.

If desired, the Cooler can also be furnished at a small expense with a FILTERING APPARATUS, which serves the additional purpose of removing all impurities from the water, rendering it perfectly clear and wholesome.

The Coolers and Filter may be seen in operation at any time at BURNETT'S HOUSE FURNISHING ESTABLISHMENT, No. 14 West Fourth street, CINCINNATI.

He has adopted the principle of identifying the customer's interest with that of the Doctor's, by giving a detail always on hand the greatest variety of every description of Furniture, from the cheapest ash chair, to the most elegant Rosewood Parlor Suit, each piece of which, passing from one improvement to another, has, at length, arrived as near perfection as it is possible to reach. A proof of this is found in the several hundred of these Coolers now in all parts of the country. A single trial of the simple statement of facts in regard to these Coolers, will satisfy every one of their superiority. First, they are the only article of the kind ever patented. They are furnished with two distinct non-conducting chambers, by means of which, with two pounds of ice in the while water is kept at a temperature of 60° above zero, or 45° from freezing (all day). Thus, at a cost of 25 cents per day, a family or ordinary size can be constantly supplied with water as cold as low thrifty large numbers in the same proportion. This has been found by actual experiment to be a saving of at least seventy-five per cent. over the earthen jars formerly used for this purpose.

Again, these Coolers NEVER SWEAT, in this way saving much unnecessary waste and trouble.

Being manufactured in the most workmanlike style, and handsomely finished in every respect, they make a beautiful ornament to any room, being at the same time

An important improvement has lately been added to the Cooler, viz: a small apparatus for filling from ice to eight pounds of butter) inserted directly under the cover. This quantity of butter can be kept perfectly sweet all day, without additional ice; a very important addition to the economy and comfort of a city residence.

If desired, the Cooler can also be furnished at a small expense with a FILTERING APPARATUS, which serves the additional purpose of removing all impurities from the water, rendering it perfectly clear and wholesome.

The Coolers and Filter may be seen in operation at any time at BURNETT'S HOUSE FURNISHING ESTABLISHMENT, No. 14 West Fourth street, CINCINNATI.
