FOR A SHORT TIME ONLY.

NEW DISCOVERY FOR THE EYES.

SPECTACLES, &c., GROUND ON THE MONS, the celebrated Opticians, of Paris, and Manufacturers to the Royal Society and London Optical Establishment, are now introduced into Pittsburgh, and more than any other.

C. SOUBRONS, the sole inventor of the Improved Spectacles, and various improved Glasses, is now on a visit to this country, and may be consulted at his OFFICE, LAFAYETTE BUILDING, Fourth street, Pittsburgh, for a short time only.

He has had the honor of attending the above named personages in the United Kingdom, where he has received the most flattering testimonials of approbation, and was solicited to make a visit, for a short time, to the Court of Russia, which he declined, as he has the honor to be employed by the most eminent Oculists, and improved Spectacles.

Those Glasses that, persons having failed in every other attempt to procure relief, have found the only ones that ever gave them, and they consequently are the property of preserving the sight of the aged to the most extreme old age, and restoring it to those in the prime of life, while they are in the enjoyment for many length of time, either by day or candle light. As several persons have had their eyes operated upon unsuccessfully, he will confidently refer further favors of the public, with confidence, solicits the favor of a call, assuring those who entrust him with their commands, that every attention shall be used to merit their approbation. Added to the advantage of personally attending practice to the infirmaries, and under one of the most eminent Oculists, he has, since his residence in Pittsburgh, had the disease of the eye under his own observation. The many testimonials of approbation.

He will give references to persons in the United States, who have found the only relief in the improved Glasses in the use of his newly invented and improved Spectacles.

NEW DISCOVERY FOR DEAFNESS.

The Sound Conductors is an extraordinary, powerful, newly invented, small in compass, and simple instrument, entirely different in make or construction from all others, surpassing them in many essentials, and can be produced. They are not modeled to the cavity of the ear, but are made to the different sizes and kind of the same color as the skin, are not perceptible. Persons deaf for years have found as great as to restore defective hearing or long standing, to the perfect use of hearing, in a few days. Call and see them, or send for a circular, containing testimonials adduced to individuals afflicted with the infirmities alluded to, which will be sent gratuitously to deafness.

"From what I have observed in the use of Mr. Solomons' glasses, I take pleasure in adding my testimony to the foregoing testimonials of the Faculty.

"J. KING, M.D."

"Pittsburgh, June 8, 1853."

"I am happy in bearing my feeble testimony in favor of Mr. Soubron's Eye-glasses; I think them superior to any that I have tried. The eyes are strengthened by their use.

"C. SPOOR, M.D.

Professor of Professing Surgeon, Washington University, Baltimore."

"Pittsburgh, June 8, 1853."

"I am of the same opinion as Mr. Solomons' Glasses, and find them very beneficial to my eyes.

"JOSEPH P. GAZZAM, M.D."

"Pittsburgh, June 8, 1853."

"It affords me pleasure to state that on the trial of several eye glasses, I have placed in my hands by Mr. Solomons a, I find myself much benefited by the use of them. I have had years of weakness in the eyes, from which I have not read for the last two years, but with the use of Mr. Solomons' glasses for a short period of time, I think they are of a kind to restore the perfect sight of the eye.

"J. J. KIDDLAND, M.D.

Professor of Practical Diagnosis, and Diseases of the Eye, of Medical Department, Western Reserve College, Cleveland, Ohio."

"The best communication I can give the Glasses of Mr. Solomons is, that I use them myself and prefer them.

"Professor of Anatomy, University of Buffalo."

"Rochester, January 14, 1851."

"Having made trial of Mr. Solomons' patent Spectacles, and also of the common spectacles which they are constructed, I have no hesitation in pronouncing the former decidedly superior to the latter, which I consider that no one can meet them fully recommend them to all who need spectacles, as being the most scientific in improving their vision.

"Professor of Pathology and Materia Medica, Geneva College, New York, late of Jefferson Medical College."

WOLFE'S CELEBRATED SCHIEDAM AROMATIC SCHNAPPS—Deeming it necessary to remind any portion of the Medical profession of the established medical properties of pure Holland gin in many diseases of dropsical tendency, I respectfully invite your examination to a very superior article, manufactured by myself exclusively, at Schiedam, in Holland, by a process peculiar to my own tendency. It is favored and medicated, not by the common harsh berry, but by the more delicate and fragrant flavor of the aromatic Italian Juniper Berry, whose virtuous solvent, and thus becomes a concentrated tincture of exquisite flavor and aroma. Altogether transcending in its medicinal and medicinal properties, to any Holland Gin heretofore known.

And the influx of inferior distillations with which the market is now flooded, physicians find no little difficulty in procuring a good and pure Gin, which they can prescribe with confidence in its beneficial effects. As an imported possessing a matured experience in the manufacture of HOLLAND GIN, especially, beg to submit to your notice my AROMATIC SCHIEDAM SCHNAPPS, as one which cannot fail to meet your utmost expectations, and shall be happy to forward to you a bottle of it, free of charge, in answer to a letter intimating your readiness to accept it.

It is now scarcely one year since I have prepared and purchased my SCHIEDAM GIN exclusively for medicinal purposes, and within the short period, have been favored by all the principal Druggists in the United States, and by the following:
