...BURGH GAZETTE.

...RIDAY MORNING, JULY 22, 1853.

...A STRICT CONSTRUCTIONIST.—Mr. Buchanan, ...the choice of the people at Philadelphia ex... ...the Presidency, gave the follow... ...ing succinct, illustrative of a Virginia Congress... ...man's idea of "strict construction," in the olden time:

"[I] have never known but one man who could ...exactly [suit] Gov. Davis,] in that particular, and ...that was a friend of mine, from Virginia, in the ...ancient times. And I will tell you what I do know. The gentleman became alarmingly ill at ...one of these times—he was at the point of death—he had ...formerly before him, and all that troubled his ...conscience was, lest he should be buried in the ...Congressional Burial Ground at the public ex... ...pense. [Laughter and applause.] He sent for a ...friend with whom he was acquainted, and, in ...prospect of eternity, said to him, 'I would near... ...ly as lief take the chance of being damned, as to entertain the idea that Congress, without any ...authority from the Constitution, should appro... ...priate money to bury me.'" (Immoderate laugh... ...ter.) So he said. 'For God's sake, prevent that, ...if possible.'"

It is a great pity that there are not "a few more of the same sort left," but they are not, they are all gone, and it is no favorable omen of the future prosperity and honor of our country, that their death-bed speeches, inculcating sentiments filled with just and good public morals, meet no higher use in our times than to point a paragraph in a political speech, and to enable the reporter to add in parenthesis, (great laughter here.) The member from Virginia, (John Robinson,) having lived in purity, did not wish to rot in corruption—the idea is certainly industrious—*none-a days.—Detroit Adv.*

MISCELLANEOUS.

IMPORTANT TO HOUSEKEEPERS.

SOMETHING better and more economical than Soda, Cream Tartar, or any other preparation in existence, for Raising—DURKEE'S CHEMICAL SALERATUS OR BAKING POWDER, for raising Bread, Biscuits, Fried, Griddle and Johnny Cake, Dumplings, Pastry, &c. &c. This article is one that every family, Hotel, Boarding House, Saloon, Ship, Steamboat, Saleratus Factory, Yeast, Candy Boat, &c. will find, upon a careful trial, to be the very best article ever used, and one that will save them many times its cost in point of economy.

It has important advantages over the old system, are: 1st. No waste of time, or expense of milk, eggs, shortening, spoiled bread, and the troubles and expense of procuring good yeast, every time you bake.

2d. No time is required for the dough to rise before baking, as soon as mixed and upon having light, sweet, tender and palatable bread and biscuit, whether the flour be fresh or stale.

3. Bread made by this process is much more nutritious, easier of digestion, better (and we believe the vegetable sweeter, whiter and lighter, than when made with yeast in the old way. It is made by fermentation, does not affect the same amount of nourishment to the system, that it does when made with the ordinary process, because the vegetable acid contained in fermented bread, prevents the proper action of the gastric juice, and consequently, it is not ready to nourish the body, while the acids tend to produce dyspepsia and the attendant evils.

4. Bread and biscuit made by this process, and in yolve, actually thinned. When used according to the directions, it is warranted to do so.

Be careful to ask for DURKEE'S BAKING POWDER, and take no other, or you will not be freed, Principal office, 199 Water street, New York. Sold by the best grocers and druggists generally.

MISCELLANEOUS.

SAVE YOUR ICE.

Barnet's Patent Water Cooler.

WE are now prepared to offer our friends and customers a somewhat novel article of WATER COOLERS, of entire new styles and at greatly reduced prices. These coolers are the result of the application of scientific principles to the purpose intended, viz: to keep water as cool as possible, *as long as possible*, and *with the least possible quantity of ice.*

The proprietor has long devoted his attention to this particular branch of domestic economy, and hearing from one improvement to another, has, at length, arrived at near perfection as it is possible to be, as proof of this he can say in the very general use of these Coolers in all parts of the country. A simple statement of facts in regard to these Coolers, will satisfy every one of their superiority. First, they are the *only articles of the kind ever patented.* They are furnished with wet flannel jackets, by means of which, with two pounds of ice to the gallon, water is kept at a temperature of 40° above zero, from heating fall day). Thus, at a cost of some three cents per day, a family can obtain water as cool as it can be had in the city, at all seasons of the year. Being in the right form, this has been done in fifteen hours, being in addition to the above, a saving of at least seventy-five per cent. over the earthen jars formerly used for the purpose.

Another and very important feature in this way saves much unnecessary waste and trouble.

Being manufactured in the most workmanlike style, and handsomely finished in every respect, they make a beautiful ornament for the sideboard or dining room.

An important improvement has lately been added to the Cooler, viz: a small tap (costing but fifteen cts to eight pounds of butter) ins-ted directly under the ice chamber, which can be drawn off at any time in the day, without additional ice every important addition to the economy and comfort of a family.

In addition to the Cooler can also be furnished at a small expense with a FILTERING APPARATUS, which serves the additional purpose of removing all impurities from the water, rendering it perfectly clear and wholesome.

The Coolers and Filters can be seen in operation at any time at BURNET'S HOUSE FURNISHING ESTABLISHMENT, No. 14 East Fourth street, CINCINNATI.
