Reese's Patent Coupling and Foreplate,

FOR RAIL-PLATE AND SHEET-ROLLS.

CAN NOW BE SEEN IN OPERATION

At Messrs Bally, Brown & Co's Rolling Mill, Pittsburgh, or the "Union works," Mercer county, Pa. The advantage of my improvement are—that it obviates the necessity of the usual practice of the drawing of the crab to connect the top rail when Scrapping, as the top roll is repeated and disconnected in an instant without resort to the engine, crab or any other power. The FOREPLATE is also constructed in such a way and manner that it is placed or displaced in half a minute, without removing a single scraper, bolt, or nut. On the last, though not least advantage of my improvement is, that by it you can change to any of the Rolls Sciences now in use, thus making a higher point on the "Mouth screw," than has ever been suggested before. Further information, or a right to use the same, can be obtained of the inventor,

JACOB REESE.

lyl Manager of "Union Mills," Pittsburgh.
