Reese's Patent Coupling and Foreplate,

FOR NAIL-PLATE AND SHEET-IRON,

CAN NOW BE SEEN IN OPERATION at Messrs Bailly, Brown & Co.'s Rolling Mill, Pittsburgh, or the "Sharon Works," Mercer county, Pa. The advantages of my improvement over that heretofore used, is the necessity of stopping the engine or drawing of the rolls to remove the plate when Scarring or the top roll is connected and disconnected in an instant without regard to the shrink, crab or anything else. The FOREPLATE is also construct-d so simple and completed, that it is placed or displaced in half a minute, without removing a guide, scraper, bolt, or nut. The last, though not least advantage of all improvements is, that by it you are enabled to Scour the Rolls between heats, the saving of a Heat per Day, and Working that has ever been got out before. Further information, or a right to use the same, can be obtained of the Inventor on the premises.

Manager of "Clinton Mills" Pittsburgh, Pa.
