Reese's Patent Coupling and Foreplate,

FOR RAIL-PLATE AND SHEET-ROLLS,

CAN NOW BE SEEN IN OPERATION

At Messrs Bailly, Brown & Co.'s Rolling Mill, Pittsburgh, or the "Source Works," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or throwing off the crab to send at the end of each train—as the top rolls is connected and disconnected in an instant without respect to the engine, crab or the gearing. The FOREPLATE is also constructed on simple and complete that it is placed or displaced in half a minute, without removing a single, rung, bolt, or nut. The last, though not least advantage of my improvement is, that by it you are enabled to make Rail in Sections bent, thus making a better polish on Rail-plate and Sheet-iron than has ever been produced before. Further information can at any time be obtained of the inventor

JACOB REESE,

Manager of "Citizens Mills," Pittsburgh.
