Reese's Patent Coupling and Foreplate, FOR WAIL-PLATE AND SHEET-RODS.

CAN NOW BE SEEN IN OPERATION at Moore Hall, Brown & Co.'s Rolling Mill, Pittsburgh, or the Athens Works, Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or throwing off the crab to connect the top rail when shearing, as the top rail is connected to the bottom rail by a hinge, without the aid of the crab or anything else. The FOREPLATE is also connected on simple and complete that it is placed on directly in half a minute, without removing a guide, scraper, bolt, or nut. The last, though not least advantage of my improvement is, that when you are compelled to lower the bolts between bars, thus making a higher bolish, you will find the connection then made and ready for use, without further improvement, or of right to use the same, can be obtained of the inventor.
