### Resse's Patent Coupling and Foreplate,

FOR NAIL-PLATE AND SHEET-ROLLS,

CAN NOW BE SEEN IN OPERATION at Messrs Kelly, Brown & Co.'s Rolling Mill, Pittsburgh, on the "Sharon Route," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or running off the rest to connect the top rolls when coupling, as the coupling is connected and disconnected in an instant without the exertion of the engine, crab or anything else. The FOREPLATE is also constructed so simple and complete that it is placed or displaced in half a minute, without stopping the guide, screws, bolts, or nut. The fast, though not least advantage of my improvement is, that by it you are enabled to Recut the Rolls between Rests, thus making a Rolled Groove as good as New—and at a trifling cost. Further information, or a right to use the same, can be obtained of the Inventor

JACOB RESSE,

Manager of "Clinton Mills," Pittsburgh.
