Reese's Patent Coupling and Foreplate,

FOR RAIL-FLEAK AND SHEET-IRON.

CAN NOW BE SEEN IN OPERATION

at Messrs Bailey, Brown & Co.'s Rolling Mill, Pittsburgh, or the "Sharon Works," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or throwing off the belt to connect the top R.I. when Screwing, as the top rail is connected and disconnected in an instant without removing a pin or bolt, or any thing else. The FOREPLATE is the easiest, as well as anything else. The FOREPLATE is also constructed so simple and complete that it is placed or displaced in half a minute, without removing a rule, screper, bolt, or nut. The last though not least advantage of my improvement is, that by it the ends are raised clear of the Hollow Iron Rail, thus making a higher Heel Joint and thereby preserving the Rail from the wedge polish on Nail-plate and Sheet-iron that is usually found to cut before. Further information, or a right to use the same, can be obtained of the inventor.

JACOB REESE,

Manager of "Clinton Mills," Pittsburgh.
