Reese's Patent Coupling and Foreplate,

FOR NAIL-PLATE AND SHEET-ROLLS,

CAN NOW BE SEEN IN OPERATION

at Messrs Baily, Brown & Co.'s Rolling Mill, Pittsburgh, or the "Station Works," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or proving of the rolls to connect the top roll when Scouring, as the top roll is connected and disconnected in an instant without recourse to the engine, crab or any thing else. The FOREPLATE is also constructed so simple and complete that it is placed or displaced in half a minute, without requiring a guide, scraper, bolt, or nut. The last, though not least advantage of my improvement is, that by it you are saved to Scour the plate between heats, as the plate is higher polish on Nail-plate and Sheet-iron than has ever been got out before. Further information, or a right to use the same, can be obtained of the inventor.
