It is believed it will be much greater. The completion of the North Branch Canal, the increase of trade upon the canals, consequent upon the development of the resources of this is great mineral Commonwealth, and the augmentation of the receipts for taxes upon every succeeding valuation in the Sixte, render it certain that our revenue will reach a much higher amount; and that the amount annually to be at part for the extinguishment of the public debt, will considerably exceed \$1,500,000. But I will be spart for the extinguishment of the public debt, will considerably exceed \$1,500,000. But I will be perceived that if the Company is organized on the 1st day of Jannary, 1854, that in welve years from that time, the whole public debt of Pennsylvania will be extinguished, and the great productive coal canals will still be the property of the State. If the Legislature new incorporates a Company to carry out this great measure, the abundance of capital now seeking investing the summan of the property of the State.
