Rose's Patent Coupling and Foreplate,

FOR NAIL-PLATE AND SHEET-ROLLS.

CAN NOW BE SEEN IN OPERATION at Messrs Bally, Brown & Co's Rolling Mill, Pittsburgh, or the "Shawnee Works," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or 12 minutes if the crab to connect and disconnect in an instant without respect to the angles, crab or anything else. The FOREPLATE is also constructed so simple and complete that it is placed or displaced in half a minute, without removing a guide, scraper, bolt, or nut. The last, though not least advantage of my improvements, that by it pieces are made to secure the bolts between *heats*, thus making a higher polish on Nail-plate and Sheet-iron than has ever been got out. Further information can be had right to the case, and can be obtained of the inventor.
