Reese's Patent Coupling and Foreplate,

FOR NAIL-PLATE AND SHEET-ROLLS,

CAN NOW BE SEEN IN OPERATION at Messrs Bally, Brown & Co.'s Rolling Mill, Pittsburgh, or the "Sharon works," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or throwing off the crank to connect the bolt; it is the fewest parts of the top roll is connected and disconnected in an instant without respect to the engine, crank or anything else. The FOREPLATE is also constructed so simple and complete, that it is placed or displaced in half a minute, without removing a guide, scraper, bolt, or nut. Too late though not least advantages of my improvement is, that by it you are enabled to lower the rolls between heats, thus making a higher polish on Nail-plates and Sheet-iron than has ever been got out before. Further information or a right to use the same, may be obtained of the inventor.
