Recess's Patent Coupling and Foreplate,

FOR NAIL-PLATE AND SHEET-ROLLS,

CAN NOW BE SEEN IN OPERATION

at Messrs Kelly, Ewen & Co.'s Rolling Mill, Pitt-burgh, or the "Shamokin Works," Mauch Chunk. The advantages of my improvement are—that it obviates the necessity of stopping the machine or throwing of the crab to connect the Nail Plate when Running, as the top roll is connected and disconnected in an instant, and is applicable to the engine, crab, or anything else. The FOREPLATE is also constructed to supply and complete that it is placed or clamped in half a minute, without requiring a screw-driver, bolt or nut. The last, though not least advantage of it is improvement is that by it you are enabled to lower the Nail Plate from the cutting edge of the Nail Rolls to any required distance, thus enabling a thicker polish on Nail-Plate than heretofore, and to a point as near the cutting edge as possible. For further information, apply to the Manager at Messrs Kelly, Ewen & Co.'s Rolling Mill, Pittsburgh. JOHN RECESS.
