Reese's Patent Coupling and Foreplate,

FOR MAIL-PLATE AND SHEET-ROLLS,

CAN NOW BE SEEN IN OPERATION

At Messrs Bailly, Brown & Co.'s Rolling Mill, Pittsburgh, or the "Sharon Works," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or throwing off the clutch to come at the roll when fouling, as the top roll is connected and disconnected in an instant without respect to the engine, crab or anything else. The FOREPLATE is also constructed so simple and complete that it is placed or displaced in half a minute, without removing a screw, center, bolt, or nut. The last, though not least advantage of my improvement is, that by it you are enabled to Double the Rail Grooves in the same length of the Rolls, and Sheet-iron than has ever been got out before. Further information, or a right to use the same can be obtained of the undersigned.
