said to be going when the rebels gave purseit,

the imperialists also proceeding to the city with
their goods, to take up quarters with the rebels,

Sidence than they did in their legitimate protections.

On the 80th, the Imperialist fleet weighed early and proceeded towards the eastern suburbs, which they also ineffectually attempted to destroy; desisting at the hour of 9. A. M. On the Slat of August, the armies arrayed themselves against each other about two miles from the town; in the evening the Imperialists marched off to their "Chobham"—the rebels to their "Tower." The Imperialist may effected, on this day, a good deat of damage among the northern and western suburbs. On the last instant all was quiet, the imperialists remaining in camp. Further advices are looked for with some anxiety. About Canton things may be said to remain in state que, but an approaching orisis is indicated by the lamentable stagnation of trade; the high rates of exchange (6s. 7d. per dollar for good bills on England, and 808 rupees per \$100 for East India Company's accepted paper) being ead proof of the absence of the circulating medium. H. M. sloop Lully has been sent up to guard the factories, and apparently emboldened by a reliance on the probability of quiet existing for some time, H. E. Admiral Pellew intends, it is reported, to proceed to Manilla shortly, with the Winchester and Styr. Authentic intelligence reached Canton a day or two ago, to the effect that is detachment from the Nanking army had reached the borders of Kwangei, at the point where the Pearl river enters from the Kwangtung province, and that the patriots only waited news of the fall of Peking to advance towards Canton. Hard sighting is looked for about the Melling Pass, to which place the Viceroy Yeh has been for some time sending troops.

At Shanghe both black teas and raw silk have been offering freely during the month, but the conditions imposed by holders have been such as greatly to restrict operations; no desire is evined to take manufactures, and transactions have been chiefly effected by means of optum at very low prices, and bullion from Canton. "It will be readily perceived by all discerning young men, that Democracy is a ladder corresponding in politics to the one spiritual which Jacob saw in his vision; one up which all, in proportion to their merit, may ascend.
