Rose's Patent Coupling and Foreplate, FOR MAIL-PLATE AND SHEET-ROLLS.

CAN NOW BE SEEN IN OPERATION at Messrs. Selby, Brown & Co.'s Rolling Mill, Pittsburgh, for the "Empire Works," Rochester, N. Y. The advantages of my improvement are—that it obviates the necessity of the whole train of machinery, as the top roll is operated and disconnected in an instant without respect to the engine, crop or anything else. The FOREPLATE is also connected in a simple and complete manner that it is turned or thrown back in half a minute, without removing a guide, scraper, apron or nut. The last, though not least advantage of my improvement is that by it you are enabled to turn the Mail Bolts from the mail-plate, and the Spike holes in the Sheet-Iron can be punched at the same heat, or finished at the Ingot Mill, or a blank for the Mail Bolts, can be finished at the Ingot Mill, and the Spike holes punched at the same, can be finished at the Ingot Mill.
