These parties have pressed forward with very commendable perseverance and have just completed about 100 miles locations, including a full location of the line from the Sand Patch summit to Cumberland. They will be disbanded in the course of the next test days, only a small portion of each being retained during the winter to make up the estimated maps &c of the various lines. In view of the present unstitled state of the negotiations for the right of way, for the first sixteen miles along the Monorgables river, it is deemed increased length of the lines we have surveyed from the city to a point some distance below Connellayille in the Koughlogeny river, where they re canneet. From this point to near Cumberland no serious difficulty will exist about land damages; indeed for mearly the whole of this distance our active and energetic Commissioner, A. L. Ransell, Esq., has obtained free releases of the right of way from the land owners. By the time the cast of the right of way on either side of the Monongabela has been ascertained, our estimates will be fully propacted, the relative merits of the different lines collated, and made the subject of a future report. In the present only a general description of them will be given.

Gen. Larimer, as President, on behalf of the Directors, presented and read the exceedingly lucid and estisfactory annual report which we publish on our first page. It gives a succeint and intelligible history of the proceedings of the Board up to this period with a cheering account of the gratifying prospects nowhedore that great enterprise.
