The Administration has thrown itself upor he country, which country Congress is. The Message and the Reports from the Department present a summary view of their case. You have probably before this laid before your read-

in respect to the principles and policy which will be the guide of his conduct in the discharge of his duties. He lets the people know hor estly and candidly that he is opposed to any scheme for improving the navigation of the wes tern rivers, or for protecting the harbors of the lake coasts. It is evident enough from this part

over the ground, as if he knew that a missie on one side might send him over a precipics upon the heads of the strict constructionists. or a slight deviation upon the other might deof the west, with which for peculiar reasons he desires to stand well at this time.
