Reese's Patent Coupling and Foreplate,

FOR MAIL PLATE AND SHEET RODS,

CAN NOW BE SEEN IN OPERATION at Messrs Selly, Brown & Co.'s Rolling Mill, Pittsburgh, or the "Shoen Works," Mercer county, Pa. The advantages of my improvement are—that it obviates the necessity of stopping the engine or throwing off the gear to connect the top roll with the bottom roll and disconnected in an instant without pressure on the engine, bolt or anything else. The FOREPLATE is also constructed so simple and complete that it is placed or displaced in half a minute, without removing a guide, bearer, bolt, or nut. The great and peculiar advantages of my improvement is, that by it you are enabled to pass the Rod between the plates, thus making a higher quality on Nail-plate and therefore than has ever been got out before. For information, or a right to use the same, can be obtained of the inventor.
