is easier to work quietly with a few tools in the Legislature, than to have public opinion, for the implicitors workers know that if they once get the wedge in, with their power over the Democracy of this State, they can easily drive it farther year, with deceptions amendments.

If he does not he will soon hear the thunder of the people.

We need not point out to our readers the danger of such provisions to our whole common achool system. It could not stand the effects of such ablighting process fiveyears. The people, such would be its injurious operations, would require the repeal of the whole system, and leave the children of the poor to grow up in Ingorance, and that is just what the Roman Church desires.

Youngstown is a flourishing boasy place, and one with which our merchants may profitably cultivate business relations.
