Some curves facts have been brought out, showing the corruption of the New York fire department. The fire's suppleted to have been brought as a ties who entered the building to great, and some of whom were killed by its fall. On their bodies were found fixe oldthing which they had evident-ly stolen from the store. Mr. Carson, the Chief Engineer of the fire department, testifies that he believes there is a gang of men in that fity under the garb of firemen, who run to fres for the purpose of stealing, and likewise that he has known members of the fire Department to steal. He further stated that in one instance a detected thief who had been furmed out of the department was re-instated by the City Council, and that foreman of one of the companies was a thief. He expressed his belief that one half of the fires occurring in New York were of in-cendiary origin, and that one of the greatest sames of this incendiarism was that the fires af-forded opportunities for theft. The New York papers comment on these statements as evidence PORTABLE THRASHING MACHINES AND SEPARATORS. WARRANTED to be thoroughly M. W.
