EX. Designed problems of the second problems

MARING MACHINERY FOR ENGLARD.—The Massachusetts Arms Company at Chicopee, Mass., are now constructing for the British Government, a complete set of machinery for doing gun-work. The machines are modeled from those in the arrenal in Springfield. This is, probably, the first machinery, with the exception of a few models of looms, &c., made in this country for England, and certainly the first ever made for the English Government.
