our duty, as journalists, to chronicle many strange events and much conduct disgraceful to men; but nothing quite so strange or so disgraceful to men, but free citizens of a free country as the developments of Know Nothingiam. The revelations in the New York Legislature are still free in the minds of our readers, and the extraordinary proceedings at Harrisburgh are still spreading consternation and grief throughout this State. We have now another phase of Know Nothingiam to present, derived from its proceedings in Virginia, where it is quite as rampant as in the Northern States. The annual election for Governor and members of Congress, takes place in that State on the 20th of May, and the contest seems to be narrowing itself down into a distinct issue on the Know Nothing question. The revelations we have to make concern the Congressional election in the Wheeling district, and show the finesse and deception to which the Know Nothings resort to secure a public entracts. The same to be first the secure a public entracts where the first secure a public entracts the entracts and the testion of the its was redeated; and the Pennsyltenam the stells the tale:

"The late advices from New York have shown that all recent attempts to obtain fresh sums in Lordon by railway nortgage bonds have proved unsuccessful. Proposals, however, are now in circulation to raise £460,000 in 7 per cent. bonds, on the security of the Panams Bailway, which is expected to be completed from sea to sea by the end of next month. Whether they will be taken is doubtful. Altogether the aggregate amount of the existing bond and floating debt of the company is alreasly largor than their paid up capital, their position is respectable, and the prospects of future receipts are very favorable. But it is not merely to the actual and immediate financial position of such concerns that persons disposed to become lenders are now obliged to look. "The late advices from New York have sho
