ALLEGHENY VALLEY ROAD.—We are indebted to J. T. Logan, Treasurer of the Allegheny Valley Railroad, for a pamphlet copy of the Annu found on our first page.

The report of the President and Managers opens with expressing a regret that they wer not able to announce the opening of the first division of the road, and attributes the failure t complete it to the stringency in the money mark et and the inability of the Iron manufacturin company to deliver the iron in season. Iron sufficient to lay the road from Pittsburgh to Mahoning, 54 miles, was contracted for to be delivered by the lat of October last; but the mill was unable to comply with the contract in season

owing to the severe drought of the summer. The directors express their confidence in the ramount importance and eventual completion of the work, and think the postponement of laying the track till spring will render the roadbed much more solid and durable. They the proceed to recapitulate the advantages and ecessity of their enterprise, and the important of improving the pavigation of the Ohio so as to secure a more perfect communication between the lower Ohio and New York, Philadelphia and ton by way of Pittsburgh and the Allegheny Valley Boad.

The first division of the road from Pittsburg to Kittanning, with the extension to the mouth of Mahoning, will be completed during the enming sesson, and the construction of this por tion of the work will not exhaust the Company resources. The receipts of this part of the line when in operation, will, it is thought, pay the interest on its cost. The mouth of the Mahonwhich to concentrate the trade and travel of the Allegheny and its tributaries. It is not the intention of the company to stop permanently at Mahoning; the road will be pushed forward from that point, as soon as the means of the Compan

Description and beginning to complete the Annual Report of Solomon W. Roberts, Eaq., Chief Superintendent of the Ohio and Pennsylvania Bailroad Company. It is a model report, succinct and clear in its statements, conveying useful and interesting information, and free from all humbug and special pleading. It presents the affairs of that road, as regards its transportation and business, in a most flattering light, and shows it to be one of the most profitable and ibest managed roads in the country. He very properly takes strong ground in favor of the extension of the road to this side of the viver, and we trust the present most efficient Board of Directors will carry out his recommendations in this respect.

A long season of inactivity and dulhees has lately deprived it of much of its legitimate interest. There has been too little to do to keep up the spirit of daily meetings. Nevertheless, it has proved of great advantage to those who

have attended it regularly, and those who are interested in Commercial affairs always find something there to enlist their attention. A permanent place for business men to meet and confer together and become advised of mercantile intelligence, is a public necessity. While

Important to Persons afflicted with Hernis, or Bupture of the Bowels, and the
danger of Strangulation by neglecting it.

The right course for anyone to pursue who
may be afflicted with Ruptum, is to procure a good Truns
well adapted to the ruptured parts, to order to retain the
protrading portion of the bowels. This is often neglected,
and the lowel becomes strangulated, leaving the patient
not only in a guillaring but dangurous condition. I have and the lower becomes strangulated, leaving the patient-not only in's suffering but dangerous condition. I have always on hand, and daily dasp, the most improved Trusses, among which is MARSH'S MADICAL CURE TRUSS, which will really produce a radial cure in a short time. Of course there are cases when no Truss will cure but to a vast majority of reducable Herria, or Rupture, this Truss will cure. I have every variety of Trusses.
