CUBIOUS CONBINATION .--- Mr. Campbell, of Co CURIOUS CONBINATION.--MF. Campbell, of Co-lumbus, Ohio, has made application at Washing-ton for a patent, making a bond of union be-tween cast iron at a very high temperature, and glass in a state of fusion, and designed for box-as in which the azles of wheels revolve. The glass is for the interior of the box, and, causing it but little friction, it requires but little labeler tion, and is, therefore, economical, costing less than cast iron. The Intelligencer says:--"The tests to which the specimen we have seen has been subjected, at once convinced us that iglass thas embedded in iron could sustain extra-sordinary pressure and the inest powerful blows :

The been all the sended of in iron could sustain extra-ordinary pressure and the nost powerful blow; i but a doubt arcse in relation to the inequality in the contraction and expansion of the two mate-rials, by sudden elanges in their temperature.— Iron, however, expands and contracts by heat far more than glass, and the cast iron box being expanded to its utmost when the glass congresis, all its after tendency by this means must necessa-rily be to embrace the glass within at; and this glass being in the form of an arch, with its ba-ses and apex both embraced by the iron, it can yield to no power that is not capable of literal-ly crushing it to powder." BETTER THES- The New York Seeing Hir-ror says that "the clouds so gloomy and oppres-eive that recently lowered upon the city are breaking, rising and scattering. The radiant bow of hope gleams upon their departing skirts; and glimpess of pure sky give promise of milder brighter and better days. The scorp houses are no longer thronged by the famiahing poor, and the beggars in the streats are subsiding. We hear of no more clamor for bread or for work; and as all the departments of trade and indu-

ly crushing it to powder.
