TO DEALERS IN WASHBOARDS.

IN 1847 O. RICE, of Cincinnati, invented a valuable *Improvement in Washboards*, for which he obtained Letters Patent. This improvement consisted in properly preparing the *Slopes* of a piece of Zinc (or other suitable metal) to fit in Tin Rabbets, and then cutting out with punches, a number of slits or tears in the slope, through which the water would pass freely into the solid wooden sides or legs of a Washboard; the methods previously employed, having been to punch or perforate the Zinc, and then nail the whole plate. O. RICE subsequently sold his entire interest in said Patent to the subscriber, who has since taken out a new *Sole Proprietor Patent*, as well as *entirely improved machinery* for manufacturing the same. O. RICE'S IMPROVED WASHBOARDS, having acquired the high reputation they deserve, the subscriber has induced the proprietor of the Patent to allow him the privilege of manufacturing them in this city, for sale in Pittsburgh and vicinity, and has now on hand a large assortment of the most approved patterns, which he will be glad to show to the trade, and which will be sold at a great sacrifice. JOHN I. SMITH, Manufacturer.
